INDEX TO VOLUME 23

INDEX TO VOLUME 23

AUTHOR INDEX

In addition to the regular issues of *Cancer Research*, the following supplements were published during 1963:

Vol. **23**, No. 2, Part 2, Cancer Chemotherapy Screening Data XIX, pages 1–258.
Vol. **23**, No. 4, Part 2, Cancer Chemotherapy Screening Data XX, pages 259–520.
Vol. **23**, No. 5, Part 2, Cancer Chemotherapy Screening Data XXI, pages 521–980.
Vol. **23**, No. 6, Part 2, Cancer Chemotherapy Screening Data XXII, pages 981–1234.
Vol. **23**, No. 7, Part 2, Cancer Chemotherapy Screening Data XXIII, pages 1235–1474.
Vol. **23**, No. 8, Part 2, Cancer Chemotherapy Screening Data XXIV, pages 1475–1730
Vol. **23**, No. 9, Part 2, Cancer Chemotherapy Screening Data XXV, pages 1731–1906.
Vol. **23**, No. 10, Part 2, Cancer Chemotherapy Screening Data XXVI, pages 1907–2210

Each of these supplements contains its own index, and a cumulative index is found in No. 10, Part 2. The articles appearing in the 1963 supplements are listed in this index *by author only*, and such entries are indicated by "CS" preceding the number—e.g., CS 20.

SUBJECT INDEX

AAF. *See* 2-Acetylaminofluorene.

2-Acetylaminobiphenyl, pathological effects of, in dog. Jabara, 921

4-Acetylaminobiphenyl, pathological effects of, in dog. Jabara, 921

2-Acetylaminofluorene, conjugation of cholic acid in liver fractions of rats fed. Songster, Schochet, and Farber, 1069

——, metabolism in the dog. Poirier, Miller, and Miller, 790

——, pathological effects of, in dog. Jabara, 921

——, rat hepatomas induced by. Hiramoto, Jurand, Bernecky, and Pressman, 109

Acid phosphatase, activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Actinomycin D, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effect on DNA synthesis in cultured mammalian cells. Shah, 1137

——, effects *in vivo* on nucleic acid synthesis, compared with mitomycin C. Schwartz, Sternberg, and Philips, 1125

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

Actinomycins, biochemistry of. Reich, 1428

Adenine, administered gastrically, effect in normal and tumor-bearing mice. Sartorelli and Upchurch, 1077

Adenocarcinoma 755, ascites cells, resistance to 6-thioguanine, and combination treatment with azaserine. Ellis and LePage, 436

——, chemotherapy with 6-thioguanine, in mouse. Adams and Bowman, 883

——, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in mouse. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

——, interaction with vaccinia virus. Durr and Briody, 410

——, mouse, effect of 6-mercaptopurine and 6-chloropurine on. Elion, Callahan, Rundles, and Hitchings, 1207

——, mouse, lack of effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

Adenoma, morphologic and biochemical features of, in rainbow trout. Scarpelli, Greider, and Frajola, 848

Adrenal, enzymes in tissues responsive to corticosteroids. Rosen, 1447

——, function of, in rats and mice bearing mammo-somatotropic tumors. Cohen and Kim, 93

——, imbalance, in mouse skin carcinogenesis. Trainin, 415

——, necrosis, induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

Adrenal cortical tumor E 12529, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Adrenalectomy, effect on growth of 3,4,9,10-dibenzpyrene-induced tumors. Benton, 1016

——, effect on mouse skin carcinogenesis. Trainin, 415

——, effect on threonine and serine dehydrase in rat hepatomas. Bottomley, Pitot, and Morris, 392

Adrenotropic activity, of mammo-somatotropic tumors in rats and mice. Cohen and Kim, 93

AET. *See* S-(2-Aminoethyl)thiuronium bromide hydrobromide.

Africa, childhood lymphoma in, *review*. O'Conor, 1514

——, geographical pathology of primary liver cancer. Higginson, 1624

Aging, nuclear stability during, *review*. Walker, 157

***Agrobacterium tumefaciens* (Smith & Town) Conn.**, and crown gall, *review*. Kupila, 497

Alanine, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003

Alcohol, lack of effects in mouse neoplasia. Ketcham, Wexler, and Mantel, 667

Alkaline phosphatase, activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Alkaloids, Vinca, in chemotherapy. Johnson, Armstrong, Gorman, and Burnett, 1390

Alkylating agents. *See also* specific names.

——, biological, resistance to, in chemotherapy. Wheeler, 1334

——, biological effects in cancer chemotherapy. Schmidt, 1311

——, combined with inhibitors of nucleic acid biosynthesis, effect against transplanted mouse tumors. Booth and Sartorelli, 1762

——, effect on NK lymphoma cells, in mouse. Lapis and Mercer, 676

——, mechanism of action in chemotherapy. Warwick, 1315

——, summary of discussions on. Price, 1350

American Cancer Society, symposium on problems basic to cancer chemotherapy, 1181

Amethopterin. *See* Methotrexate.

Amines, carcinogenic, effect of dimethylnitrosamine on liver cells. Mukherjee, Gustafsson, Afzelius, and Arrhenius, 944

Amino acid analogs, effects of, on DNA synthesis in cultured mammalian cells. Shah, 1137

Amino acids. *See also* specific amino acids.

——, in cell fractions of rat liver and Walker tumor. Steele and Busch, 1153

——, incorporation by *in vitro* tumor and liver systems. O'Neal and Griffin, 628

——, incorporation in liver tumors of different growth rates. Wagle, Morris, and Weber, 1003

3′-Amino-3′-deoxyadenosine, effect against ascitic tumors of mice. Pugh and Gerber, 640

S-(2-Aminoethyl)thiuronium bromide hydrobromide, distribution and chemical forms of, in mammary tumor-bearing mice. Shapiro, Schwartz, and Kollmann, 223

2-Aminofluorene. *See* 2-Fluorenamine.

2-Amino-1-fluorenol, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

2-Amino-3-fluorenol, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

2-Amino-5-fluorenol, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

2-Amino-7-fluorenol, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

1-Amino-2-naphthol, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

——, effect on metabolites of, on thermal stability of DNA. Troll, Belman, and Levine, 841

2-Amino-1-naphthol, effect on metabolites of, on thermal stability of DNA. Troll, Belman, and Levine, 841

Aminopeptidase, activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

4-Aminopyrazolo(3,4-*d*)pyrimidine, effect of gastrically administered adenine on tumor inhibition produced by, in mice bearing Sarcoma 180 ascites cells. Sartorelli and Upchurch, 1077

Amnion cells, human, in tissue culture, effect of human leukemia brain extracts on. Whitaker, Bovis, Andrews, and Sulkin, 519

——, primary and transformed, human, chromosomes of. Petursson and Fogh, 1021

Amphenone analogs, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

Amphibia, spontaneous and transmissible tumor in the newt. Inoue and Singer, 1679

——, three different types of tumors in Salientia. Elkan, 1641

——, transmissibility and cytology of renal carcinoma of frog. Roberts, 1709

Anaerobiosis, effect on glutamine utilization by Ehrlich ascites tumor cells. Kvamme and Svenneby, 291

Androgens, biochemical and clinical aspects of, in chemotherapy. Segaloff, 1459

Anemia, and spontaneous hamster carcinoma. Sherman, Rigby, Hackett, and Friedell, 1689

——, treatment in tumor-bearing hamster, with cortisone and sodium salicylate. Sherman and Friedell, 180

***p*-Anisaldehyde thiosemicarbazone,** slight effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

Anthracene, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

Antibiotics. *See also* specific antibiotics, such as Actinomycin D, Mitomycin C.

——, biochemistry of actinomycins. Reich, 1428

——, effects of, on DNA synthesis in cultured mammalian cells. Shah, 1137

Antibody, cytotoxic, against leukemias induced by Friend virus. Old, Boyse, and Lilly, 1063

Antigenic differences, between normal and polyoma virus-transformed hamster cells. Bases, 811

Antigens, blood group, in benign and malignant human breast tissue. Tellem, Plotkin, and Meranze, 1528

Arginine, response of Jensen sarcoma cell cultures to analogs, homologs, and peptides of. White, Smith, and Kruse, 1051

Arsanilate-As^{74}, uptake compared with arsonoazoproteins, in tissues of tumor-bearing mice. Mego and McQueen, 523

Arsenic-labeled arsonoazoproteins, uptake in tissues of tumor-bearing mice. Mego and McQueen, 523

Arsonoazoalbumin-As^{74}, tissue uptake in tumor-bearing mice. Mego and McQueen, 523

Arsonoazoproteins, As^{74}-labeled, uptake in tissues of tumor-bearing mice. Mego and McQueen, 523

Ascites hepatomas 129, mouse, patterns of synthesis of deoxyribonucleoside triphosphates in. Kielley, 801

Ascites hepatoma AH 13, Yoshida, submicroscopic characteristics of. Hoshino, 209

Ascites hepatoma AH 130, Yoshida, submicroscopic characteristics of. Hoshino, 209

Ascites hepatoma AH 602, Yoshida, submicroscopic characteristics of. Hoshino, 209

Ascites hepatoma AH 7974, Yoshida, submicroscopic characteristics of. Hoshino, 209

Ascites tumors. *See also* specific names, such as Ehrlich.

——, cytotoxic effects of hemolytic streptococci on. Havas, Donnelly, and Porreca, 700

——, mouse, *in vitro* progression of. Rabotti, Geldner, and Hoffner, 165

——. tumor nodules in chorioallantoic membrane of chick after inoculation of. Leighton, 148

Aspartate, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003

Audiogenic stress, effect on methylcholanthrene-induced carcinogenesis in mice. Molomut, Lazere, and Smith, 1097

Autoradiography, of effects of antibiotics, amino acid analogs, and nucleases on DNA synthesis in culture. Shah, 1137

8-Azaadenine, effect of gastrically administered adenine on tumor inhibition produced by, in mice bearing Sarcoma 180 ascites cells. Sartorelli and Upchurch, 1077

6-Azaguanine, lack of effect on uracil mustard inhibition of Sarcoma 180. Booth and Sartorelli, 1762

8-Azaguanine, lack of effect on uracil mustard inhibition of Sarcoma 180. Booth and Sartorelli, 1762

5-Azaorotic acid, as inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

Azaserine, combination treatment with 6-thioguanine of mouse ascites tumors. Ellis and LePage, 436

——, combined with 9-butyl-6-thioguanine, effect on Ehrlich ascites cells *in vivo*. Kimball and LePage, 1792

——, in chemotherapy of mouse mammary tumors. LePage and Howard, 622

——, lack of effect on uracil mustard inhibition of Sarcoma 180. Booth and Sartorelli, 1762

5-Azauracil, as inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

6-Azauridine, clinical effect compared with 2′,3′,5′-triacetyl-6-azauridine. Creasey, Fink, Handschumacher, and Calabresi, 444

——, clinical investigations in chemotherapy with. Calabresi, 1260

——, in chemotherapy. Prusoff, 1246

Azo dye carcinogenesis, zonal electrophoresis of soluble proteins of liver and tumor in. Sorof, Young, McCue, and Fetterman, 864

B particles, production by mouse mammary epithelium in organ cultures. Lasfargues and Feldman, 191

Bacteria, cytotoxic effects of hemolytic streptococci on ascites tumor cells. Havas, Donnelly, and Porreca, 700

Bacterial contamination, absence of toxohormone in rat tumors free of. Kampschmidt and Schultz, 751

——, of tumor, effect on tumor-host relationships. Kampschmidt and Upchurch, 756

Bacterial polysaccharide, repeated response of Sarcoma 37 to endotoxin. O'Malley, Achinstein, and Shear, 890

BDF$_1$ ascites tumor, mouse, *in vitro* progression of. Rabotti, Geldner, and Hoffner, 165

Benz[*a*]anthracene, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

——, in induction of neoplasms in planarians. Foster, 300

——, susceptibility of infant mice to. Klein, 1701

Benzo[*a*]pyrene, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

——, colon sarcomas induced in rats by. Stevenson and von Haam, 569

——, in induction of neoplasms in planarians. Foster, 300

——, lack of effect of urethan on sarcoma induction by. Berenblum and Trainin, 983

——, photodynamic effect of, on *Paramecium caudatum*. Epstein, Burroughs, and Small, 35

——, spectroscopy of, *in vivo* and *in vitro*. Sloane and Loeser, 1555

Benzyl[bis-(1-aziridinyl)phosphinyl]carbamate, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

——, threonine and serine dehydrase in rat hepatomas. Bottomley, Pitot, and Morris, 392
Enzymology, comparative, of rat hepatomas. Ono, Blair, Potter, and Morris, 240
Ependymoblastoma, mouse, chemically induced, transplantable, in studies of uptake of arsonoazoproteins. Mego and McQueen, 523
Epidemiology, interpretations of data. Doll, 1613
——, of breast cancer, *review*. Lilienfeld, 1503
——, of cancer, VIII International Cancer Congress report, 3
——, of childhood lymphoma in Africa, *review*. O'Conor, 1514

Erythroagglutination reaction, and spontaneous hamster carcinoma. Sherman, Rigby, Hackett, and Friedell, 1689

Erythrocyte, sialic acid content compared with Ehrlich ascites carcinoma cell. Miller, Sullivan, and Katz, 485

Escherichia coli, action of phthalanilide drugs on. Pine, Harzewski, and Wissler, 932

Esterase, activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Estradiol benzoate, uterotrophic response to, in tumor-bearing mice. Hilf, Lerner, Lang, and Borman, 304

Estriol, uterotrophic response to, in tumor-bearing mice. Hilf, Lerner, Lang, and Borman, 304

Estrogens, biochemical and clinical aspects of, in chemotherapy. Segaloff, 1459

——, dependency of experimental mammary cancer on pituitary role. Sterental, Dominguez, Weissman, and Pearson, 481

——, uterotrophic response to, in tumor-bearing mice. Hilf, Lerner, Lang, and Borman, 304

Estrone, uterotrophic response to, in tumor-bearing mice. Hilf, Lerner, Lang, and Borman, 304

Ethidium bromide, compounds related to, purine metabolism of Ehrlich ascites cells inhibited by. Henderson, 491

——, metabolism in Ehrlich ascites carcinoma cells and normal mouse cells. Kandaswamy and Henderson, 250

Ethionine, conjugation of cholic acid in liver fractions of rats fed. Songster, Schochet, and Farber, 1069

Ethyl-*N*-bis-(2,2-dimethylethylenimido)phosphorocarbamate, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

Ethyl carbamate, lack of effect on sarcoma induction by 3,4-benzpyrene. Berenblum and Trainin, 983

——, lung tumor induced with, inhibition by total-body x-radiation. Foley and Cole, 1176

Ethylenebis(maleurate), cytotoxic effects on Ehrlich ascites tumor cells. Okada and Roberts, 217

Etiology, of cancer, *review*. Southam, 1105

Evaluation, of tumor morbidity or mortality. Pilgrim and Dowd, 45

Fat. *See* Lipides.

Feet, of mice, effects of heat and radiation on cancers of. Crile, 372

Fibroblast-like cells, from human amnion culture, effect of factor from HeLa cells on. Foley, Kennedy, and Ross, 368

Fibroblasts, hamster embryo, properties in culture. Todaro, Nilausen, and Green, 825

——, mouse, properties of DNA of, *in vitro*, effects of nitrogen mustard. Brewer and Aronow, 285

Fibrosarcoma, transplantable, hamster, treatment with cortisone and sodium salicylate. Sherman and Friedell, 180

Fish, hepatic tumors of rainbow trout. Scarpelli, Greider, and Frajola, 848

2-Fluorenamine, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782

***N*-2-Fluorenylacetamide**. *See* 2-Acetylaminofluorene.

Fluorescence spectroscopy, of carcinogenic hydrocarbons *in vivo* and *in vitro*. Sloane and Loeser, 1555

Fluorescent antibody staining, for blood group antigens in human breast tissue. Tellem, Plotkin, and Meranze, 1528

Fluorescent antibody technic, and antihepatoma sera. Hiramoto, Jurand, Bernecky, and Pressman, 109

Fluorescent microscopy, of HeLa cells, effect of terramycin on mitochondria. Journey and Goldstein, 551

Fluorinated pyrimidines, experimental and clinical use. Heidelberger and Ansfield, 1226

——, metabolism of 5-fluorouracil-2-C^{14} and 5-fluoro-2′-deoxyuridine-2-C^{14} in cancer patients. Mukherjee, Boohar, Wentland, Ansfield, and Heidelberger, 49

——, tissue distribution of 5-fluorouracil-2-C^{14} and 5-fluoro-2′-deoxyuridine in cancer patients. Mukherjee, Curreri, Javid, and Heidelberger, 67

Fluorine, substitution in 10-methyl-1,2-benzanthracene, carcinogenicity of. Miller and Miller, 229

Fluorocarbon emulsification technic, for preparation of cell-free leukemic brain extracts. Whitaker, Bovis, Andrews, and Sulkin, 519

5-Fluoro-2′-deoxyuridine, effect on *in vitro* synthesis of acid-soluble thymine of human tumors. Birnie and Heidelberger, 420

——, experimental and clinical use of. Heidelberger and Ansfield, 1226

——, mouse lymphomas sensitive to. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

5-Fluoro-2′-deoxyuridine-2-C^{14}, metabolism in cancer patients. Mukherjee, Boohar, Wentland, Ansfield, and Heidelberger, 49

——, tissue distribution in cancer patients. Mukherjee, Curreri, Javid, and Heidelberger, 67

9α-Fluorohydrocortisone, effect on mouse lymphoma. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

***p*-Fluorophenylalanine**, effect on DNA synthesis in cultured mammalian cells. Shah, 1137

9α-Fluoroprednisolone, effect on ribonuclease and nucleic acids in lymphosarcoma P1798 in mice. MacLeod, King, and Hollander, 1045

Fluoropyrimidines, effect on lymphomas, *in vivo* studies on tumor resistance and collateral sensitivity. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

5-Fluorouracil, combined with uracil mustard, effect against transplanted mouse tumors. Booth and Sartorelli, 1762

——, effect on *in vitro* synthesis of acid-soluble thymine of human tumors. Birnie and Heidelberger, 420

——, effect on murine leukemogenic Rauscher virus. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762

——, effect on ribonuclease and nucleic acids in lymphosarcoma. MacLeod, King, and Hollander, 1045

——, effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

——, experimental and clinical use of. Heidelberger and Ansfield, 1226

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

——, mouse lymphomas sensitive to. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

——, tumor resistance to, in Gardner lymphosarcoma. Kasbekar and Greenberg, 818

5-Fluorouracil-2-C^{14}, metabolism in cancer patients. Mukherjee, Boohar, Wentland, Ansfield, and Heidelberger, 49

——, tissue distribution in cancer patients. Mukherjee, Curreri, Javid, and Heidelberger, 67

Folic acid, combined with thioTEPA, effect on IRC 741 rat leukemia. McKenzie and Brody, 118

——, effect on vincristine therapy of leukemia. Johnson, Armstrong, Gorman, and Burnett, 1390

Folic acid antagonists, effects of, in chemotherapy. Werkheiser, 1277

——, in man, chemotherapy. Bertino, 1286

——, summary of discussions on. Nichol, 1307

Folic reductase activity, and folic acid antagonists in chemotherapy. Werkheiser, 1277

Food intake, effect on uterine response to estrogens in tumor-bearing mice. Hilf, Lerner, Lang, and Borman, 304

Fowl pox virus, hyperplasia induced in chorioallantoic membrane of chicken embryos. Wagle, Ashmore, and Levine, 1808

Fractionation, cellular. *See* Cell fractionation.

French pressure cell, nuclear disruption of rat liver and tumor for isolation of nucleoli. Desjardins, Smetana, Steele, and Busch, 1819

Friend virus, cytotoxic antibody against leukemias induced by. Old, Boyse, and Lilly, 1063

——, in various mouse strains. Fieldsteel, Dawson, and Bostick, 355

Friend virus leukemia, pathologic studies in mice. Dawson, Fieldsteel, and Bostick, 349

Frog, transmissibility and cytology of renal carcinoma of. Roberts, 1709

——, tumors in common grass. Elkan, 1641

Fructose, metabolism of, in liver tumors of different growth rates. Sweeney, Ashmore, Morris, and Weber, 995

Fructose-1,6-diphosphatase, in liver tumors of different growth rates. Weber and Morris, 987

Gall, Crown, cytology of, *review*. Kupila, 497

Gardner lymphosarcoma 6C3HED. *See* Lymphosarcoma 6C3HED Gardner.

Gastric cancer, human, and intrinsic factor defect. Nelson and Howe, 1756

GED. *See* Bis(2-guanidoethyl)disulfide.

Genetics, and cancer, VIII International Cancer Congress report, 3

Genitourinary tract, human female, colonial study of cells from. Cummins and Ross, 1581

Geographical pathology, VIII International Cancer Congress report, 3

——, of primary liver cancer. Higginson, 1624

Germ-free mice, newborn, susceptibility to tumor induction by 3-methylcholanthrene. Kelly, Newton, and O'Gara, 978

Glucosamine, effect on respiration of Landschuetz ascites tumor cells. Ram, Kalner, and Bloch-Frankenthal, 600

Glucose, metabolism of, in liver tumors of different growth rates. Sweeney, Ashmore, Morris, and Weber, 995

——, utilization in homogenates of Morris hepatoma 5123 and other tumors. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

Glucose-6-phosphatase, in liver tumors of different growth rates. Weber and Morris, 987

Glucose-6-phosphate dehydrogenase, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

——, in liver tumors of different growth rates. Weber and Morris, 987

——, in rat hepatomas. Ono, Potter, Pitot, and Morris, 385

——, reciprocal relationship with threonine dehydrase in rat hepatomas. Bottomley, Pitot, Potter, and Morris, 400

Glucose supply, by living host of Yoshida ascites hepatoma. Del Monte and Rossi, 363

β-Glucuronidase, activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Glutamic-oxaloacetic transaminase, and tumor size during therapy of cancer patients. Brindley and Francis, 112

Glutamine, utilization, by Ehrlich ascites tumor cells, effect of anaerobiosis. Kvamme and Svenneby, 291

Glutathione, effect with maleuric acid on Ehrlich ascites tumor cells. Okada and Roberts, 217

Glycerides, biosynthesis in mammary gland and tumor, in mouse. Terner and Korsh, 858

α-Glycerophosphate dehydrogenase, activity in human tumors. Mori, Miyaji, Murata, and Murakami, 1685

——, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Glycine, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003

Glycolysis, of Yoshida ascites hepatoma *in vivo*, in rat. Del Monte and Rossi, 363

Glycoproteins, plasma, in tumor-bearing rat. Macbeth, Bekesi, and Tuba, 938

Gonadotropin, evidence for a variant of, in choriocarcinoma. Schwartz and Mantel, 1724

Gross leukemia, histogenesis of, in mouse. Goodman and Block, 1634

Gross virus, electron microscopy of leukemia induced in rats with. Okano, Kunii, and Furth, 1169

Guerin carcinoma, peptidase activities in, in rat. Wu and Bauer, 954

Hamster, cheek pouch heterografts of mouse leukemia in cheek pouch of. Adams, 1834

——, normal and polyoma virus-transformed cells, antigenic differences between. Bases, 811

——, special property of cheek pouch, in heterografts of mouse leukemia. Adams, 1841

——, spontaneous carcinoma, and anemia. Sherman, Rigby, Hackett, and Friedell, 1689

——, strain A1 cells, cultured, effects of antibiotics, amino acid analogs, and nucleases on DNA synthesis in. Shah, 1137

——, transplantable pituitary tumors of. Russfield, Friedler, and Frenkel, 720

——, treatment of anemia in tumor-bearing, with cortisone and sodium salicylate. Sherman and Friedell, 180

——, tumor cells, growth properties of polyoma virus-induced. Todaro, Nilausen, and Green 825

——, tumors induced with diethylnitrosamine. Herrold and Dunham, 773

Heat, effects on cancers implanted on feet of mice. Crile, 372

HeLa cells, cultured, effects of antibiotics, amino acid analogs, and nucleases on DNA synthesis in. Shah, 1137

——, effect of serum from partially hepatectomized rats on. Wrba and Rabes, 1116

——, effects of mitomycin C on, in cell culture. Kuroda and Furuyama, 682

——, factor from, promoting colonial growth of human cells in culture. Foley, Kennedy, and Ross, 368

——, fine structure of cultured. Fuse, Price, and Carpenter, 1658

——, mitochondria of, effect of terramycin on. Journey and Goldstein, 551

Hemangioendothelioma BW 6473, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Hemoglobin, of host rat, during growth of tumor contaminated with bacteria. Kampschmidt and Upchurch, 756

Hemolytic streptococci, cytotoxic effects of, on ascites tumor cells. Havas, Donnelly, and Porreca, 700

Hepatectomy, and liver regeneration in rat, humoral factor in. Fisher, Fisher, and Saffer, 914

——, humoral and local factors in liver regeneration. Alston and Thomson, 901

Hepatic metastases, effect of prolactin on. Fisher and Fisher, 1532

Hepatomas, amino acid incorporation in, of different growth rates. Wagle, Morris, and Weber, 1003

——, and liver, biochemical characteristics of. Pitot, 1474

——, carbohydrates enzymes in liver tumors of different growth rates. Weber and Morris, 987

——, effect of amides fed to dogs. Jabara, 921
——, glucose and fructose metabolism in, of different growth rates. Sweeney, Ashmore, Morris, and Weber, 995
——, in mice exposed to methylcholanthrene. Klein, 1701
——, morphologic and biochemical features of, in rainbow trout. Scarpelli, Greider, and Frajola, 848
——, mouse, ascites, patterns of synthesis of deoxyribonucleoside triphosphates in. Kielley, 801
——, peptidase activities in, in rat. Wu and Bauer, 954
——, primary, rat, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131
——, rat, deaminase activity in normal rat liver and hepatomas. Roth, Sheid, and Morris, 454
——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135
——, rat, after feeding of peanut meal. Salmon and Newberne, 571
——, rat, glucose-6-phosphate dehydrogenase and pyrimidine reductases in. Ono, Potter, Pitot, and Morris, 385
—— rat, immunohistochemical differences among induced. Hiramoto, Jurand, Bernecky, and Pressman, 109
——, rat, pyrimidine metabolism in minimal-deviation. Ono, Blair, Potter, and Morris, 240
——, rat, regulation of threonine and serine dehydrase in. Bottomley, Pitot, and Morris, 392
——, rat, threonine dehydrase and glucose-6-phosphate dehydrogenase in. Bottomley, Pitot, Potter, and Morris, 400

Hepatoma 129, ascites, effect of gastrically administered adenine on mice bearing. Sartorelli and Upchurch, 1077
——, production of collagen in. Gullino and Grantham, 648

Hepatoma 134, ascites, effect of combinations of uracil mustard and 6-thioguanine on. Booth and Sartorelli, 1762
——, ascites, effect of gastrically administered adenine on mice bearing. Sartorelli and Upchurch, 1077
——, production of collagen in. Gullino and Grantham, 648

Hepatoma 3683. *See* Morris hepatoma 3683.

Hepatoma 3924. *See* Morris hepatoma 3924.

Hepatoma 5123. *See* Morris hepatoma 5123.

Hepatoma 7800. *See* Morris hepatoma 7800.

Hepatoma BW 7756, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Hepatoma H-35. *See* Reuber H-35 hepatoma.

Histidase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

Histochemical substrate film method, ribonuclease activities in experimental and human tumors. Daoust and Amano, 131

Histochemistry, of α-glycerophosphate dehydrogenase activity in human tumors. Mori, Miyaji, Murata, and Murakami, 1685
——, of human squamous-cell cancer, enzymatic activities in. Kawakatsu and Mori, 539
——, of hydrolytic enzyme activity in spontaneous mammary cancer. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

Histogenesis, nuclear stability during, *review.* Walker, 157
——, of Gross's viral induced mouse leukemia. Goodman and Block, 1634
——, unilateral, of AKR thymic lymphoma. Siegler and Rich, 1669

HN2. *See* Methylbis(β-chloroethyl)amine.

HN2O. *See* Methylbis(β-chloroethyl)amine *N*-oxide.

Hodgkin's disease, clinical treatment with Vincristine. Bohannon, Miller, and Diamond, 613
——, treated with vinblastine. Midwest Cooperative Chemotherapy Group, 169

Homeostasis, host factor in growth of neoplastic cells. Furth, 21

Homogenates, of various tissues, effect on tumor growth. Fisher and Fisher, 1651
——, tissue, mitotic responses of compensating rat kidney to injections of. Goss, 1031

Hormones, action of androgens and estrogens in chemotherapy. Segaloff, 1459
——, adrenal imbalance and mouse skin carcinogenesis. Trainin, 415
——, as host factors in growth of neoplastic cells. Furth, 21
——, effect of prolactin on hepatic metastases. Fisher and Fisher, 1532
——, effect on production of B particles in mouse mammary glands in organ culture. Lasfargues and Feldman, 191
——, tumor hormonal content in rats and mice bearing mammo-somatotropic tumors. Cohen and Kim, 93

Host, influence on collagen content of tumor mass. Gullino and Grantham, 648

Host effects, from bacterial contamination of rat tumor. Kampschmidt and Upchurch, 756

Host factors, influence on growth of neoplastic cells. Furth, 21

Host resistance, against sarcomas, induced by cellophane film implantation. Klein, Sjögren, and Klein, 84

Host-tumor relationships, VIII International Cancer Congress report, 3

Human, amnion cells, chromosomes of primary. Petursson and Fogh, 1021
——, breast tissue, blood group antigens in. Tellem, Plotkin, and Meranze, 1528
——, cells, in culture, effect of factor from HeLa cells on. Foley, Kennedy, and Ross, 368
——, chemotherapy of various tumors with vinblastine. Midwest Cooperative Chemotherapy Group, 169
——, childhood lymphoma in Africa, *review.* O'Conor, 1514
——, clinical and pharmacological studies with 2′,3′,5′-triacetyl-6-azauridine. Creasey, Fink, Handschumacher, and Calabresi, 444
——, clinical evaluation of vinblastine and vincristine. Johnson, Armstrong, Gorman, and Burnett, 1390
——, clinical investigations with 6-azauridine and 5-iodo-2′-deoxyuridine. Calabresi, 1260
——, clinical pharmacology of 5-iodo-2′-deoxycytidine. Calabresi, Creasey, Prusoff, and Welch, 583
——, clinical use of fluorinated pyrimidines. Heidelberger and Ansfield, 1226
——, colonial study of cells from female genitourinary tract. Cummins and Ross, 1581
——, enzyme in serum of, which hydrolyzes leucyl-β-naphthylamide. O'Connell and Winzler, 78
——, epidemiology of breast cancer, *review.* Lilienfeld, 1503
——, evaluation of steroid seroflocculants. Blickenstaff and Foster, 778
——, fate of 5-bromodeoxyuridine and related compounds in man. Kriss, Maruyama, Tung, Bond, and Révész, 260
——, folate antagonists in man. Bertino, 1286
——, geographical pathology of primary liver cancer. Higginson, 1624
——, α-glycerophosphate dehydrogenase activity in tumors of. Mori, Miyaji, Murata, and Murakami, 1685
——, identification of 2-dimethylamino-6-hydroxypurine in urine of normal and leukemic subjects. Fink, Adams, Davis, and Nakatani, 1824
——, interpretations of epidemiologic data on smoking and lung cancer. Doll, 1613
——, intrinsic factor deficiency in malignant neoplasia of stomach. Nelson and Howe, 1756
——, *in vitro* synthesis of acid-soluble thymine compounds by neoplastic tissues of. Birnie and Heidelberger, 420

Human—*Continued*
——, laryngeal papillomatosis, electron microscopy of. Svoboda, Kirchner, and Proud, 1084
——, leukemia brain extracts of, effect on stable amnion cells in tissue culture. Whitaker, Bovis, Andrews, and Sulkin, 519
——, metabolism of fluorinated pyrimidines in cancer patients. Mukherjee, Boohar, Wentland, Ansfield, and Heidelberger, 49
——, serum lactic dehydrogenase and glutamic-oxaloacetic transaminase during therapy of cancer patients. Brindley and Francis, 112
——, squamous-cell cancer, histochemical evaluation of enzymes in, Kawakatsu and Mori, 539
——, tissue distribution of fluorinated pyrimidines in cancer patients. Mukherjee, Curreri, Javid, and Heidelberger, 67
——, tumor cells, growth in suspension cultures. Moore, Mount, Tara, and Schwartz, 1735
——, tumors, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131
——, variant of gonadotropin in choriocarcinoma. Schwartz and Mantel, 1724
——, vincristine in treatment of lymphomas and leukemias. Bohannon, Miller, and Diamond, 613
Human cell line D98/AG, molecular radiobiology of. Erikson and Szybalski, 122
Human cell lines, radiosensitizing effects of 5-iododeoxyuridine incorporation into DNA of. Erikson and Szybalski, 122
Human epidermoid carcinoma H.Ep. #2, chromosomes in culture of. Norryd and Fjelde, 197
——, chromosomes in, *comment*. Tooland, 1102
Humoral factor, in liver regeneration, in rat. Alston and Thomson, 901
——, in liver regeneration, in rat. Fisher, Fisher, and Saffer, 914
Hydrocarbons, carcinogenic, spectroscopy of, *in vivo* and *in vitro*. Sloane and Loeser, 1555
——, polynuclear, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148
Hydrocortisone, effect on mouse skin carcinogenesis. Trainin, 415
Hydrocortisone acetate, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607
Hydroglucan, effect on mouse tumors. Diller, Mankowski, and Fisher, 201
Hydrolytic enzyme activity, in spontaneous mammary cancer, histochemistry of. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665
***N*-Hydroxy-2-acetylaminofluorene**, urinary metabolite of 2-acetylaminofluorene in the dog. Poirier, Miller, and Miller, 790
***o*-Hydroxy amines**, carcinogenicity of, evaluated by bladder implantation, in mice. Irving, Gutmann, and Larson, 1782
Hydroxylamine, effect of metabolites of, on thermal stability of DNA. Troll, Belman, and Levine, 841
6-Hydroxylaminopurine, effect of gastrically administered adenine on tumor inhibition produced by, in mice bearing Sarcoma 180 ascites cells. Sartorelli and Upchurch, 1077
Hydroxymethylglyoxalbis(guanylhydrazone), comment on. Davidson, Engle, and Mancuso, 1708
4-Hydroxypyrazolo(3,4-*d*)pyrimidine, effect on catabolism of 6-mercaptopurine and 6-chloropurine. Elion, Callahan, Rundles, and Hitchings, 1207
Hypoglycemic activity, of methylglyoxalbis(guanylhydrazone). Mihich, 1375

Immune reactions, to Calvacin, in various mammals. Sternberg, Philips, Cronin, Sodergren, and Vidal, 1036
Immunity, and spontaneous regression of Shope rabbit papilloma. Kreider, 1593
——, reciprocal, in mice to Sarcoma 180 and Leukemia 180. Pasqualini, Holmberg, Rabasa, and Pavlovsky, 974
——, to leukemia L1210, in mice. Glynn, Humphreys, Trivers, Bianco, and Goldin, 1008
——, toward cheek pouch heterografts of mouse leukemia in hamsters. Adams, 1834
Immunization, effect on oncolytic activity of vaccinia virus. Durr and Briody, 410
Immunohistochemistry, of induced rat hepatomas. Hiramoto, Jurand, Bernecky, and Pressman, 109
Immunologic aspects, of viral tumors. Furth, 21
Immunology, and cancer, VIII International Cancer Congress report, 3
——, antigenic differences between normal and polyoma virus-transformed hamster cells. Bases, 811
——, antisera against Ehrlich ascites tumor in tolerant rabbits. Levi and Schechtman, 1566
——, cytotoxic antibody against leukemias induced by. Old, Boyse, and Lilly, 1063
——, neutralization of mouse mammary tumor virus by rabbit antisera against C3Hf tissue. Blair, 381
Infant mice, susceptibility to tumorigenesis. Klein, 1701
Influenza virus, effect alone and with cigarette smoke, on mouse respiratory tract. Leuchtenberger, Leuchtenberger, Ruch, Tanaka, and Tanaka, 555
Inhibitors, of nucleic acid biosynthesis, combined with alkylating agents, effect against transplanted mouse tumors. Booth and Sartorelli, 1762
International Cancer Congress, VIII, report on, 3
Intestinal mucosa, sensitivity to 6-thioguanine, in rabbit Marchesi and Sartorelli, 1769
Intestine, absorption of fat in, in tumor-bearing rats. Baker, 928
——, lysozyme activity in, in tumor-bearing rats. Perri, Cappuccino, Faulk, Mellors, and Stock, 431
——, rat, effects of mitomycin C and actinomycin D on nucleic acid synthesis in. Schwartz, Sternberg, and Philips, 1125
——, small, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in human. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715
——, small, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in mouse. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715
Intrinsic factor, deficiency of, in malignant neoplasia of stomach. Nelson and Howe, 1756
5-Iodo-2′-deoxycytidine, clinical pharmacology of. Calabresi, Creasey, Prusoff, and Welch, 583
——, combined with uracil mustard, effect against transplanted mouse tumors. Booth and Sartorelli, 1762
——, fate in man. Kriss, Maruyama, Tung, Bond, and Révész, 260
5-Iodo-2′-deoxyuridine, chemotherapeutic and anti-viral agent. Prusoff, 1246
——, clinical investigations in chemotherapy with. Calabresi, 1260
——, combined with uracil mustard, effect against transplanted mouse tumors. Booth and Sartorelli, 1762
——, I^{125}-labeled, incorporation into DNA of murine and human tissues. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715
——, radiation-sensitizing properties of. Erikson and Szybalski, 122
IRC 741 leukemia, rat, effect of dimethylbenzimidazole. Armaghan, 744
——, rat, effect of thioTEPA and folic acid on. McKenzie and Brody, 118

Irradiation. *See also* Radiation and X-radiation.
——, myeloid leukemia induced in mice by, relation to virus. Jenkins and Upton, 1748
——, with ultraviolet, effect with benzpyrene on *Paramecium caudatum*. Epstein, Burroughs, and Small, 35
Isocitrate dehydrogenase, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539
Isoleucine, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003

JA-1 sarcoma, carbon dioxide fixation in, *in vitro*. McCoy, Orr, and Patterson, 1830
Jensen sarcoma, catabolism of xanthine and uracil in rats bearing. Wu and Bauer, 1239
——, cell cultures, response to analogs, homologs, and peptides of arginine, ornithine, and citrulline. White, Smith, and Kruse, 1051
——, content of lysozyme in rats bearing, following surgery. Perri, Cappuccino, Faulk, Mellors, and Stock, 431
——, lysozyme in kidney and spleen of rats bearing. Cappuccino, Reilly, and Winston, 850
——, peptidase activities in, in rat. Wu and Bauer, 954
——, rat, effect of actinogan on, *in vivo*. Bradner and Sugiura, 167
——, rat, resistant to mitomycin C, transplantation of. Merker, Reyes, and Anido, 1163

K region, in carcinogenesis, substitution of, in 10-methyl-1,2-benzanthracene. Miller and Miller, 229
Kidney. *See also* Renal.
——, carcinoma of, in frog, transmissibility and cytology of. Roberts, 1709
——, lysozyme activity in, in tumor-bearing rats. Perri, Cappuccino, Faulk, Mellors, and Stock, 431
——, of tumor-bearing mice, uptake of azoalbumin-As^{74} and arsanilate-As^{74} in. Mego and McQueen, 523
——, rat, after uninephrectomy, mitotic responses of, to injections of tissue homogenates. Goss, 1031
Krebs-2 carcinoma, ascites cells, cytotoxic effects of hemolytic streptococci on. Havas, Donnelly, and Porreca, 700
——, in mouse, effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

Lactation, effect on production of B particles by mouse mammary gland. Lasfargues and Feldman, 191
Lactic dehydrogenase, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539
——, in liver tumors of different growth rates. Weber and Morris, 987
——, in plasma and interstitial fluid during tumor growth, in mouse. Burgess and Sylvén, 714
——, plasma, in mice with myeloid leukemia. Nishio, Jacobson, Jenkins, and Upton, 340
——, plasma, site of production in leukemic mice. Jacobson and Nishio, 344
——, serum, and tumor size during therapy of cancer patients. Brindley and Francis, 112
Landschuetz ascites tumor cells, respiration of. Ram, Kalner, and Bloch-Frankenthal, 600
Laryngeal papillomatosis, human, electron microscopy of. Svoboda, Kirchner, and Proud, 1084
Leucyl-β-naphthylamide, enzyme in human serum which hydrolyzes. O'Connell and Winzler, 78
Leucylnaphthylamide hydrolase, in human serum. O'Connell and Winzler, 78
Leukemia. *See also* Lymphoma.
——, brain extracts of patients with, effect on stable amnion cells in tissue culture. Whitaker, Bovis, Andrews, and Sulkin, 519
——, Gross's viral induced, histogenesis of, in mouse. Goodman and Block, 1634
——, identification of 2-dimethylamino-6-hydroxypurine in urine of normal and leukemic subjects. Fink, Adams, Davis, and Nakatani, 1824
——, induced by Sarcoma 180, and reciprocal immunity. Pasqualini, Holmberg, Rabasa, and Pavlovsky, 974
——, induced in rats with Gross virus, electron microscopy of. Okano, Kunii, and Furth, 1169
——, lymphoid, Rauscher virus-induced, chemotherapy of. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646
——, Moloney virus, chemotherapy of. Glynn, Moloney, Chirigos, Humphreys, and Goldin, 269
——, mouse, cheek pouch heterograft of, in hamster. Adams, 1834
——, mouse, property of cheek pouch in heightened susceptibility to heterografts of. Adams, 1841
——, myeloid, mouse, plasma lactic dehydrogenase in. Nishio, Jacobson, Jenkins, and Upton, 340
——, myeloid, mouse, site of production of plasma lactic dehydrogenase in. Jacobson and Nishio, 344
——, radiogenic myeloid, cell-free transmission of, in the mouse. Jenkins and Upton, 1748
——, susceptible and resistant mice, fate of preleukemic cells in. Metcalf, 1774
Leukemia 180, in Sarcoma 180-immune mice. Pasqualini, Holmberg, Rabasa, and Pavlovsky, 974
Leukemia Friend virus. *See* Friend virus leukemia.
Leukemia L1210, activity of phthalanilide derivatives against. Kensler, 1353
——, ascites, action of 6-thioguanine on, *in vitro*. Brown, Klein, Kandaswamy, and Mandel, 254
——, ascites, effect of combinations of uracil mustard and 6-thioguanine on. Booth and Sartorelli, 1762
——, ascites, effect of 6-uracil methyl sulfone on. Creasey and Haff, 462
——, ascites, resistance to 6-thioguanine, and combination treatment with azaserine. Ellis and LePage, 436
——, combination of methotrexate and 2-chloro-4′,4″-di-2-imidazolin-2-ylterephthalanilide against. Venditti, Goldin, and Kline, 593
——, effect of methylglyoxal-bis(guanylhydrazone) against. Mihich, 1375
——, effect of vinblastine on resistant lines of. Johnson, Armstrong, Gorman, and Burnett, 1390
——, effects of nitrosoureas on intracerebral. Schabel, Johnston, McCaleb, Montgomery, Laster, and Skipper, 725
——, immunity to, in mice. Glynn, Humphreys, Trivers, Bianco, and Goldin, 1008
——, inhibition of purine synthesis by 6-mercaptopurine in. Bennett, Simpson, Golden, and Barker, 1574
Leukemia L1210R, nucleosides in resistance to 6-thioguanine with ascites cells of. LePage and Junga, 739
Leukemia L5178Y, ascites tumor, effect of 6-uracil methyl sulfone on. Creasey and Haff, 462
——, new inhibitors of orotic acid metabolism by extracts of. Handschumacher, 634
Leukemia P388, resistance to phthalanilide derivatives of. Burchenal, Coley, Purple, Bucholz, Lyman, and Kreis, 1364
Leukemia P815Y, effect of phthalanilide derivatives on, in culture. Burchenal, Coley, Purple, Bucholz, Lyman, and Kreis, 1364
Leukemias P818, resistance to phthalanilide derivatives of. Burchenal, Coley, Purple, Bucholz, Lyman, and Kreis, 1364
Leukemia P-1534, effect of Vinca alkaloids against. Johnson, Armstrong, Gorman, and Burnett, 1390
——, mouse, electron spin resonance spectroscopy of Nebert and Mason, 833

Leukemia T-49, in mice, effect of deuterium and x-ray treatment on. Biggs, Eiselein, and Wilcox, 1059

Leukemic cells, transplantable, maturation in diffusion chambers. Parrish and Kleinfeld, 1164

Lipides, biosynthesis of glycerides in mammary gland and tumor, mouse. Terner and Korsh, 858

——, intestinal absorption of, in tumor-bearing rats. Baker, 928

Liver, action of serum from partially hepatectomized rats on explants of. Wrba and Rabes, 1116

——, and hepatoma, biochemical characteristics of. Pitot, 1474

——, changes in fat, on regimen of alcohol in diet. Ketcham, Wexler, and Mantel, 667

——, experimental carcinogenesis of, conjugation of cholic acid *in vitro*. Songster, Schochet, and Farber, 1069

——, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in mouse. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

——, in rat, morphological and biochemical effect of dimethylnitrosamine on cells of. Mukherjee Gustafsson, Afzelius, and Arrhenius, 944

——, in rat, zonal electrophoresis of soluble proteins of. Sorof, Young, McCue, and Fetterman, 864

——, metastases of, effect of hepatic trauma on, in parabionts. Fisher and Fisher, 896

——, morphologic and biochemical features of, in rainbow trout. Scarpelli, Greider, and Frajola, 848

——, mouse, new inhibitors of orotic acid metabolism by extracts of. Handschumacher, 634

——, mouse, patterns of synthesis of deoxyribonucleoside triphosphates in. Kielley, 801

——, normal, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, normal, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, normal, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

——, normal, rat, energy pathways of. Aisenberg and Morris, 566

——, normal and regenerating, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, normal and regenerating, rat, intermediary metabolites of L-lysine-U-C^{14} in. Davis and Morris, 143

——, of tumor-bearing mice, uptake of azoalbumin-As^{74} and arsanilate-As^{74} in. Mego and McQueen, 523

——, peptidase activities, in rat. Wu and Bauer, 954

——, primary cancer, geographical pathology of. Higginson, 1624

——, rat, acidic nuclear proteins of. Steele and Busch, 1153

——, rat, amino acid incorporation by, *in vitro*. O'Neal and Griffin, 628

——, rat, deaminase activity in normal rat liver and hepatomas. Roth, Sheid, and Morris, 454

——, rat, effects of thioacetamide on labeling of RNA of. Adams and Busch, 576

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

——, rat, glucose-6-phosphate dehydrogenase and pyrimidine reductases in. Ono, Potter, Pitot, and Morris, 385

——, rat, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, rat, isolation of nucleoli of. Muramatsu, Smetana, and Busch, 510

——, rat, isolation of nucleoli of. Desjardins, Smetana, Steele, and Busch, 1819

——, rat, threonine dehydrase and glucose-6-phosphate dehydrogenase in. Bottomley, Pitot, Potter, and Morris, 400

——, regeneration of, humoral and local factors in. Alston and Thomson, 901

——, regeneration of, in rat, humoral factor in. Fisher, Fisher, and Saffer, 914

——, spontaneous and transmissible tumor of, in the newt. Inoue and Singer, 1679

——, tumors of, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, tumors of, carbohydrate enzymes in. Weber and Morris, 987

——, tumors of, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, tumors of, in rat, zonal electrophoresis of soluble proteins of. Sorof, Young, McCue, and Fetterman, 864

L-S virus, isolated from chloroleukemic Wistar rat. Lum and Schreiner, 1742

Lung, cancer, epidemiologic data. Doll, 1613

——, lysozyme activity in, in tumor-bearing rats. Perri, Cappuccino, Faulk, Mellors, and Stock, 431

——, smoke and influenza effects on, in mice. Leuchtenberger, Leuchtenberger, Ruch, Tanaka, and Tanaka, 555

——, tumor, induced with urethan, inhibited by total-body x-radiation. Foley and Cole, 1176

Lymphatic leukemia P-1534. *See* Leukemia P-1534.

Lymphocytic leukemia, solid, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Lymphoma. *See also* Leukemia.

——, effect of steroids and fluoropyrimidines on. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

——, induced by 9,10-dimethyl-1,2-benzanthracene, endemic pneumonia virus isolated from, in mice. Bather and Cushing, 707

——, thymic, unilateral histogenesis of, in mice. Siegler and Rich, 1669

Lymphoma L1210. *See* Leukemia L1210.

Lymphoma L5178Y. *See* Leukemia L5178Y.

Lymphoma P1798, effect of corticosteroids on ribonuclease and nucleic acids in. MacLeod, King, and Hollander, 1045

——, resistant and sensitive to fluorohydrocortisone. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

Lymphosarcoma 6C3HED Gardner, ascites, effect of combinations of uracil mustard and 6-thioguanine on. Booth and Sartorelli, 1762

——, ascites, effect of gastrically administered adenine on mice bearing. Sartorelli and Upchurch, 1077

——, ascites, mouse, minimal effect of 3′-amino-3′-deoxyadenosine against. Pugh and Gerber, 640

——, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

——, nucleosides in resistance to 6-thioguanine with ascites cells of. LePage and Junga, 739

——, tumor resistance to 5-fluorouracil. Kasbekar and Greenberg, 818

Lymphosarcoma Mecca, ascites, effect of combinations of uracil mustard and 6-thioguanine on. Booth and Sartorelli, 1762

Lymphosarcoma Murphy-Sturm, rat, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

L-Lysine-U-C^{14}, isolation of intermediary metabolites of, from tissues of tumor-bearing rats. Davis and Morris, 143

Lysozyme, content in normal and tumor-bearing rats following surgery. Perri, Cappuccino, Faulk, Mellors, and Stock, 431

MAC-21 cells, fine structure of cultured. Fuse, Price, and Carpenter, 1658

Maleuric acid, cytotoxic effects on Ehrlich ascites tumor cells. Okada and Roberts, 217

Malic dehydrogenase, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Mammary adenocarcinoma BW 10232, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma BW 11301, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma Ca D 1, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma Ca D 2, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma C3HBA, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma dbrB, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma H2712, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Mammary adenocarcinoma TA3, nucleosides in resistance to 6-thioguanine with ascites cells of. LePage and Junga, 739

Mammary cancer, epidemiology of, *review*. Lilienfeld, 1503

——, growth of, in potassium-deficient mice. Humphrey, 1121

——, mouse, lactic dehydrogenase in plasma and interstitial fluid during growth of. Burgess and Sylvén, 714

——, rat, pituitary role in estrogen dependency of. Sterental, Dominguez, Weissman, and Pearson, 481

——, spontaneous, histochemistry of hydrolytic enzyme activity in. Murata, Hayashi, Muraoka, Miyaji, and Mori, 1665

Mammary carcinoma B16, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Mammary glands, human, blood group antigens in. Tellem, Plotkin, and Meranze, 1528

——, mouse, production of B particles in organ cultures of. Lasfargues and Feldman, 191

——, mouse leukemia virus in, electron microscopy of. Feldman, Gross, and Dreyfuss, 1604

——, normal, preneoplastic, and neoplastic tissues of, in mice, chromosomes in. Banerjee and DeOme, 546

——, normal and tumorous, in mouse, glyceride biosynthesis in. Terner and Korsh, 858

——, rat, effects of triamcinolone diacetate on levels of 3-methylcholanthrene in. Bolasny, Warren, and Prohaska, 971

Mammary tumors, induced with 7,12-dimethylbenz[*a*]anthracene in rats. Huggins and Fukunishi, 785

——, mouse, biochemical effects of 6-thioguanine on. LePage, 1202

——, spontaneous, mouse, chemotherapy with azaserine and thioguanine. LePage and Howard, 622

——, spontaneous, mouse, lack of effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

Mammary tumor virus, mouse, neutralization by rabbit antisera against C3Hf tissue. Blair, 381

Mammotropin, effect on production of B particles in mouse mammary glands in organ culture. Lasfargues and Feldman, 191

Mannomustine, effect on NK lymphoma cells, in mouse. Lapis and Mercer, 676

Mastomys, chromosomes of tumors induced in, by 7,12-dimethylbenz[*a*]anthracene. Huang and Strong, 1800

McCoy MDAB hepatoma, rat, deamination of deoxynucleotides and deoxynucleosides by. Roth, Sheid, and Morris, 454

Mecca lymphosarcoma. *See* Lymphosarcoma Mecca.

MEG. *See* 2-Mercaptoethylguanidine.

Melanocarcinoma, in Salientia. Elkan, 1641

Melanoma, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Melanoma B/16, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Melanoma H-P, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Melanoma S-91, implanted on feet of mice, effects of heat and radiation on. Crile, 372

——, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Melphalan. *See* *p*-Di-(2-chloroethyl)amino-L-phenylalanine.

Membrane filtration technics, for assay of incorporation of 6-thioguanine into tumor cells *in vitro*. Brown, Klein, Kandaswamy, and Mandel, 254

2-Mercaptoethylguanidine, distribution in mammary tumor-bearing mice. Shapiro, Schwartz, and Kollmann, 223

2-Mercapto-orotic acid, inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

4-Mercapto-orotic acid, inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

6-Mercaptopurine, anti-tumor activities of. Elion, Callahan, Rundles, and Hitchings, 1207

——, combined with uracil mustard, effect against transplanted mouse tumors. Booth and Sartorelli, 1762

——, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effect on murine leukemogenic Rauscher virus. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762

——, effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

——, inhibition and resistance, biochemical aspects. Brockman, 1191

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

——, inhibition of purine synthesis by. Bennett, Simpson, Golden, and Barker, 1574

5-Mercaptouracil, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

Metabolic regulatory circuits, and carcinogenesis. Pitot and Heidelberger, 1694

Metastases, effect of pinealectomy on tumor growth in rats. Rodin, 1545

——, hepatic, and effect of prolactin. Fisher and Fisher, 1532

——, hepatic, effect on hepatic trauma on, in parabionts. Fisher and Fisher, 896

——, of mouse tumors, lack of effect of alcohol on. Ketcham, Wexler, and Mantel, 667

——, of tumor nodules in chick chorioallantoic membrane after ascites inoculation. Leighton, 148

Methotrexate, combined with 2-chloro-4′,4″-di-2-imidazolin-2-ylterephthalanilide, against leukemia L1210. Venditti, Goldin, and Kline, 593

——, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effect on murine leukemogenic Rauscher virus. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

——, mechanism of action in man. Bertino, 1286

10-Methyl-1,2-benzanthracene, carcinogenicity of fluoro derivatives of. Miller and Miller, 229

Methylbis(β-chloroethyl)amine, combined with thioguanine, effect against Sarcoma 180. Booth and Sartorelli, 1762

——, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effect on cultured mammalian cells. Walker and Helleiner, 734

——, effects on physicochemical properties of mouse fibroblast DNA. Brewer and Aronow, 285

Methylbis(β-chloroethyl)amine—*Continued*

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

Methylbis(β-chloroethyl)amine *N*-oxide, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

2-Methyl-1,2-bis(3-pyridyl)-1-propanone, effect on DMBA-induced adrenal necrosis. Dao and Tanaka, 1148

3- or 20-Methylcholanthrene, colon sarcomas induced in rats by. Stevenson and von Haam, 569

——, effect of audiogenic stress on mouse carcinogenesis induced by. Molomut, Lazere, and Smith, 1097

——, effect on adrenal necrosis induced by 7,12-dimethylbenz-[*a*]anthracene. Dao and Tanaka, 1148

——, effects of triamcinolone diacetate on levels of, in rat mammary glands. Bolasny, Warren, and Prohaska, 971

——, sarcomas induced remotely in rats fed. Huggins and Grand, 477

——, spectroscopy of, *in vivo* and *in vitro*. Sloane and Loeser, 1555

——, susceptibility of infant mice to. Kleĭn, 1701

——, susceptibility of newborn germ-free mice to tumor induction by. Kelly, Newton, and O'Gara, 978

2-Methyl-4-dimethylaminoazobenzene, zonal electrophoresis of soluble proteins in rats fed. Sorof, Young, McCue, and Fetterman, 864

3′-Methyl-4-dimethylaminoazobenzene, conjugation of cholic acid in liver fractions of rats fed. Songster, Schochet, and Farber, 1069

——, in induction of neoplasms in planarians. Foster, 300

——, zonal electrophoresis of soluble proteins of tumor in rats fed. Sorof, Young, McCue, and Fetterman, 864

4′-Methyl-4-dimethylaminoazobenzene, zonal electrophoresis of soluble proteins of tumor in rats fed. Sorof, Young, McCue, and Fetterman, 864

Methylglyoxalbis(guanylhydrazone), in chemotherapy. Mihich, 1375

——, slight effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

2-Methylmercapto-orotic acid, inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

4-Methylmercapto-orotic acid, inhibitor of pyrimidine nucleotide synthesis. Handschumacher, 634

6-(1-Methyl-4-nitro-5-imidazolyl)thiopurine, antitumor activities of. Elion, Callahan, Rundles, and Hitchings, 1207

1-Methyl-1-nitrosourea, effects on intracerebral L1210 leukemia. Schabel, Johnston, McCaleb, Montgomery, Laster, and Skipper, 725

5-Methyl tryptophan, effect on DNA synthesis in cultured mammalian cells. Shah, 1137

β-Methyl tryptophan, effect on DNA synthesis in cultured mammalian cells. Shah, 1137

Metopirone. *See* 2-Methyl-1,2-bis(3-pyridyl)-1-propanone.

Microscopy. *See also* Electron microscopy, fluorescent microscopy, etc.

——, bright-field, of HeLa cells, effect on terramycin on mitochondria. Journey and Goldstein, 551

Microsomes. *See* Cell fractionation.

Mitochondria. *See also* Cell fractionation.

——, of HeLa Cells, effect of terramycin on. Journey and Goldstein, 551

Mitomycin C, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effects *in vivo* on nucleic acid synthesis. Schwartz, Sternberg, and Philips, 1125

——, effects on HeLa cells in culture. Kuroda and Furuyama, 681

Mitosis, sensitivity of cultured mammalian cells in stages of, to nitrogen and sulfur mustards. Walker and Helleiner, 734

——, activity, of rat intestine, effects of mitomycin C and actinomycin D on. Schwartz, Sternberg, and Philips, 1125

——, responses, of compensating rat kidney to injections of tissue homogenates. Goss, 1031

Moloney virus leukemia, chemotherapy of. Glynn, Moloney, Chirigos, Humphreys, and Goldin, 269

Monkey, rhesus, pathogenesis of Yaba virus-induced histiocytomas. Sproul, Metzgar, and Grace, 671

——, toxicological studies of Calvacin in. Sternberg, Philips, Cronin, Sodergren, and Vidal, 1036

Morris hepatoma 3683, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, peptidase activities, in rat. Wu and Bauer, 954

Morris hepatoma 3924, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

Morris hepatoma 3924A, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, peptidase activities, in rat. Wu and Bauer, 954

Morris hepatoma 5123, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, energy pathways of. Aisenberg and Morris, 566

——, enzymes of pyrimidine metabolism in. Ono, Blair, Potter, and Morris, 240

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, glucose-6-phosphate dehydrogenase and pyrimidine reductases in. Ono, Potter, Pitot, and Morris, 385

——, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, intermediary metabolites of L-lysine-U-C^{14} in. Davis and Morris, 143

——, peptidase activities in, in rat. Wu and Bauer, 954

——, rat, deamination of deoxynucleotides and deoxynucleosides by. Roth, Sheid, and Morris, 454

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7288, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

Morris hepatoma 7288C, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

Morris hepatoma 7316, enzymes of pyrimidine metabolism in. Ono, Blair, Potter, and Morris, 240

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7316B, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

Morris hepatoma 7777, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7793, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7794, rat, deamination of deoxynucleotides and deoxynucleosides by. Roth, Sheid, and Morris, 454

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7795, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Morris hepatoma 7800, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, energy pathways of. Aisenberg and Morris, 566

——, enzymes of pyrimidine metabolism in. Ono, Blair, Potter, and Morris, 240

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, rat, deamination of deoxynucleotides and deoxynucleosides. by Roth, Sheid, and Morris, 454

——, rat, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

Murphy-Sturm lymphosarcoma. *See* Lymphosarcoma Murphy-Sturm.

Muscle, cardiac, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

——, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in human. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

——, peptidase activities, in rat. Wu and Bauer, 954

——, of tumor-bearing mice, uptake of azoalbumin-As^{74} and arsanilate-As^{74} in. Mego and McQueen, 523

Myeloid leukemia C 1498, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Myeloid leukemia MY-1, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Myleran, combined with thioguanine, lack of effect on thioguanine inhibition of Sarcoma 180. Booth and Sartorelli, 1762

NAD. *See* Nicotinamide adenine dinucleotide.

2-Naphthylamine, effect of metabolites of, on thermal stability of DNA. Troll, Belman, and Levine, 841

Neohydrin-Hg^{203}, use in external detection of brain tumors. Long, McAfee, and Winkelman, 98

Nephroblastoma, in Salientia. Elkan, 1641

Netropsin, effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

Newt, spontaneous and transmissible tumor in. Inoue and Singer, 1679

Nicotinamide adenine dinucleotide, and analogs, and site of production of lactic dehydrogenase in plasma of leukemic mice. Jacobson and Nishio, 344

Nitrogen mustard. *See* Methylbis(β-chloroethyl)amine

4-Nitroquinoline *N*-oxide, nucleolar "caps" produced by. Reynolds, Montgomery, and Karney, 535

***N*-Nitrosodiethylamine,** hamster tumors induced with. Herrold and Dunham, 773

Nitrosoureas, effects on intracerebral L1210 leukemia. Schabel, Johnston, McCaleb, Montgomery, Laster, and Skipper, 725

NK lymphoma cells, electron microscope study of. Lapis and Mercer, 676

Novikoff ascites tumor, amino acid incorporation by, *in vitro*. O'Neal and Griffin, 628

Novikoff hepatoma, deamination of deoxynucleotides and deoxynucleosides by. Roth, Sheid, and Morris, 454

——, effect on liver catalase activity. Kampschmidt and Schultz, 751

——, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

——, peptidase activities, in rat. Wu and Bauer, 954

——, production of collagen in. Gullino and Grantham, 648

——, rat, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Nuclear proteins, acidic of Walker tumor and liver. Steele and Busch, 1153

Nucleases, effects of, on DNA synthesis in cultured mammalian cells. Shah, 1137

Nuclei. *See also* Cell fractionation.

——, of Walker tumor and rat liver, acidic proteins of. Steele and Busch, 1153

——, stability during histogenesis, aging, and carcinogenesis, *review*. Walker, 157

Nucleic acids. *See also* Deoxyribonucleic acid and Ribonucleic acid.

——, composition of nucleoli from Walker carcinosarcoma and rat liver. Muramatsu, Smetana, and Busch, 510

——, cytochemical alterations in mouse respiratory tract with smoke and influenza virus. Leuchtenberger, Leuchtenberger, Ruch, Tanaka, and Tanaka, 555

——, effect of corticosteroids on, in lymphosarcoma P1798. MacLeod, King, and Hollander, 1045

——, effects of mitomycin C on content of, in HeLa cells. Kuroda and Furuyama, 682

——, effects of thyroxine on, in mouse pituitary tumors. Moolten and Scott, 688

——, incorporation of thioguanine-8-C^{14} into, in mammary tumors in mice. LePage, 1202

——, in nucleoli of Walker tumor and rat liver. Desjardins, Smetana, Steele, and Busch, 1819

——, in nucleolus of cancer cell, *review*. Busch, Byvoet, and Smetana, 313

——, synthesis, effects *in vivo* of mitomycin C and actinomycin D on. Schwartz, Sternberg, and Philips, 1125

——, synthesis, metabolic effects of 9-butyl-6-thioguanine *in vivo*. Kimball and LePage, 1792

Nucleolar "caps," produced by 4-nitroquinoline *N*-oxide. Reynolds, Montgomery, and Karney, 535

Nucleoli, isolation of, in Walker carcinosarcoma and liver of rat. Desjardins, Smetana, Steele, and Busch, 1819

——, of Walker carcinosarcoma and rat liver, isolation of. Muramatsu, Smetana, and Busch, 510

Nucleolus, of the cancer cell, *review*. Busch, Byvoet, and Smetana, 313

Nucleosides, use in resistance to 6-thioguanine. LePage and Junga, 739

Nutritional requirements, for cultivation of canine transmissible sarcoma. Prier, 695

Omentum, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in human. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

Organ cultures, of mouse mammary glands, production of B particles. Lasfargues and Feldman, 191

Ornithine, response of Jensen sarcoma cell cultures to analogs, homologs, and peptides of. White, Smith, and Kruse, 1051

Ornithine transcarbamylase, in minimal-deviation rat hepatomas. Ono, Blair, Potter, and Morris, 240

Orotic acid, new inhibitors of metabolism of, in mouse liver and leukemia. Handschumacher, 634

Orotic acid-2-C^{14}, incorporation into RNA fractions in rat liver, effects of thioacetamide. Adams and Busch, 576

Osteogenic sarcoma, production of collagen in. Gullino and Grantham, 648

Osteogenic sarcoma T 283, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Ovarian granulosa-cell tumor E 11731, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Ovarian granulosa-cell tumor H 4929, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Pancreatic carcinoma, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in human. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

Papilloma, primary, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Papillomatosis, laryngeal, human, electron microscopy of. Svoboda, Kirchner, and Proud, 1084

Parabionts, effect of hepatic trauma on hepatic metastases, in. Fisher and Fisher, 896

Paramecium caudatum, photodynamic effect of 3,4-benzpyrene on. Epstein, Burroughs, and Small, 35

Passage A virus, in mouse mammary glands, electron microscopy of. Feldman, Gross, and Dreyfuss, 1604

Pathology, geographical, of primary liver cancer. Higginson, 1624

Peanut meal, hepatomas in rats fed. Salmon and Newberne, 571

Peptidases, activities in tissues of tumor-bearing rats. Wu and Bauer, 954

Peritoneal tumors, induced with 7,12-dimethylbenz[*a*]anthracene in rats. Huggins and Fukunishi, 785

Pharmacology, clinical, of 5-iodo-2′-deoxycytidine, compared with that of 5-iodo-2′-deoxyuridine. Calabresi, Creasey, Prusoff, and Welch, 583

Phase microscopy, effects of hemolytic streptococci on ascites tumor cells. Havas, Donnelly, and Porreca, 700

Phenanthrene, effect on adrenal necrosis induced by 7,12-dimethylbenz[*a*]anthracene. Dao and Tanaka, 1148

Phenanthridinium compounds, purine metabolism of Ehrlich ascites cells inhibited by. Henderson, 491

Phenazine methosulfate, effect on respiration of Landschuetz ascites tumor cells. Ram, Kalner, and Bloch-Frankenthal, 600

4′-Phenylacetanilide. *See* 4-Acetylaminobiphenyl.

Phosphate-P^{32}, incorporation in tissue explants, action of serum from partially hepatectomized rats on. Wrba and Rabes, 1116

Phosphoglucomutase, in liver tumors of different growth rates. Weber and Morris, 987

6-Phosphogluconate dehydrogenase, in liver tumors of different growth rates. Weber and Morris, 987

Phosphohexose isomerase, in liver tumors of different growth rates. Weber and Morris, 987

Photodynamic effect, of 3,4-benzpyrene on *Paramecium caudatum.* Epstein, Burroughs, and Small, 35

Phthalanilide derivatives, activity of, in chemotherapy. Kensler, 1353

——, mechanism of action in chemotherapy. Burchenal, Coley, Purple, Bucholz, Lyman, and Kreis, 1364

Phthalanilide drugs, action on *Escherichia coli.* Pine, Harzewski, and Wissler, 932

Physicochemical differences, between ascitic and solid forms of Sarcoma 37. Cook, Seaman, and Weiss, 1813

Pinealectomy, effect on growth of Walker 256 carcinoma in rats. Rodin, 1545

Pipecolic acid, in tumor tissues in lysine catabolism. Davis and Morris, 143

Pituitary, role in estrogen dependency of experimental mammary cancer. Sterental, Dominguez, Weissman, and Pearson, 481

——, tumors, mammo-somatotropic, in rats and mice, tumor hormonal content. Cohen and Kim, 93

——, tumors, of hamsters, biological characteristics of. Russfield, Friedler, and Frenkel, 720

——, tumors, thyrotropic, effects of thyroxine on nucleic acid and protein metabolism in, in mouse. Moolten and Scott, 688

——, tumors, thyrotropic, mouse, lymphoid hyperplasia and neoplasia associated with. Sproul, Grinberg, and Werner, 1090

——, variant of gonadotropin in choriocarcinoma. Schwartz and Mantel, 1724

Planarians, induction of neoplasms in, with carcinogens. Foster, 300

Plants, crown gall as anatomical and cytological problem, *review.* Kupila, 497

Plasma glycoproteins, in tumor-bearing rat. Macbeth, Bekesi, and Tuba, 938

Plasma iron, of host rat, during growth of tumor contaminated with bacteria. Kampschmidt and Upchurch, 756

Plasma lactic dehydrogenase, during tumor growth, in mouse. Burgess and Sylvén, 714

——, in mice with myeloid leukemia. Nishio, Jacobson, Jenkins, and Upton, 340

——, site of production in leukemic mice. Jacobson and Nishio, 344

Plasma proteins, of host rat, during growth of tumor contaminated with bacteria. Kampschmidt and Upchurch, 756

Pneumonia virus, endemic, isolated from induced lymphoma in mice. Bather and Cushing, 707

Polyoma virus, hamster cells transformed by, antigenic properties. Bases, 811

——, hamster tumor cells induced by, growth properties of. Todaro, Nilausen, and Green, 825

Polyribonucleotides, synthetic, effect of 2-naphthylamine metabolites and of hydroxylamine on thermal stability of. Troll, Belman, and Levine, 841

Polysaccharides, bacterial, repeated response of Sarcoma 37 to endotoxin. O'Malley, Achinstein, and Shear, 890

——, yeast, effect on mouse tumors. Diller, Mankowski, and Fisher, 201

Potassium-deficient mice, tumor growth in. Humphrey, 1121

Precancerous lesions, VIII International Cancer Congress report, 3

——, of mouse mammary glands, chromosomes in. Banerjee and DeOme, 546

Pregnancy, effect on production of B particles by mouse mammary gland. Lasfargues and Feldman, 191

Preleukemic cells, fate in leukemia-resistant and -susceptible mice. Metcalf, 1774

Preputial gland tumor ESR 586, mouse, electron spin resonances spectroscopy of. Nebert and Mason, 833

Presidential address, the unifying thread. Gellhorn, 961

Primary DAB hepatoma, glucose utilization in homogenates of. Elwood, Lin, Cristofalo. Weinhouse, and Morris, 906

Primates, pathogenesis of Yaba virus-induced histiocytomas. Sproul, Metzgar, and Grace, 671

Prolactin, and hepatic metastases. Fisher and Fisher, 1532

Proline oxidase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

Proteins, acidic nuclear, of Walker tumor and liver. Steele and Busch, 1153

——, effects of thyroxine on synthesis of, in mouse pituitary tumors. Moolten and Scott, 688

——, soluble, of rat liver and tumor, zonal electrophoresis. Sorof, Young, McCue, and Fetterman, 864

——, synthesis, phthalanilide drugs as inhibitors of, in *Escherichia coli.* Pine, Harzewski, and Wissler, 932

Protozoa, photodynamic effect of 3,4-benzpyrene on *Paramecium caudatum.* Epstein, Burroughs, and Small, 35

Purine antagonists, summary of discussion on. Hitchings, 1218

Purines, metabolism, inhibited in Ehrlich ascites cells by compounds related to ethidium bromide. Henderson, 491

——, synthesis, inhibition by 6-mercaptopurine. Bennett, Simpson, Golden, and Barker, 1574

Puromycin, aminonucleoside of, tested against mouse ascitic tumors. Pugh and Gerber, 640

——, effect on DNA synthesis in cultured mammalian cells. Shah, 1137

Puromycin dihydrochloride, tested against mouse ascitic tumors. Pugh and Gerber, 640

Pyridoxine deficiency, effect on growth of 3,4,9,10-dibenzpyrene-induced tumors. Benton, 1016

Pyrimidines, analog, biochemistry and pharmacology of 6-uracil methyl sulfone in rodents and dog. Creasey and Haff, 462

——, antagonists, summary of discussion on. Welch, 1244

——, antagonists, summary of discussion on. Welch, 1268

——, fluorinated, experimental and clinical use. Heidelberger and Ansfield, 1226

——, fluorinated, metabolism of 5-fluorouracil-2-C^{14} and 5-fluoro-2′-C^{14} in cancer patients. Mukherjee, Boohar, Wentland, Ansfield, and Heidelberger, 49

——, fluorinated, tissue distribution of 5-fluorouracil-2-C^{14} and 5-fluoro-2′-deoxyuridine in cancer patients. Mukherjee, Curreri, Javid, and Heidelberger, 67

——, metabolism, in minimal-deviation rat hepatomas. Ono, Blair, Potter, and Morris, 240

——, nucleotides, *de novo* synthesis inhibited by 5-azaorotic acid. Handschumacher, 634

——, reductases, in rat hepatomas. Ono, Potter, Pitot, and Morris, 385

Pyrroline-5-carboxylate reductase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

Rabbits, immunologically tolerant, antisera against Ehrlich ascites cells in. Levi and Schechtman, 1566

——, Shope papilloma, spontaneous regression of. Kreider, 1593

——, toxicological studies of Calvacin in. Sternberg, Philips, Cronin, Sodergren, and Vidal, 1036

Radiation. *See also* Irradiation and X-radiation.

——, effects on cancers implanted on feet of mice. Crile, 372

Radiation-protective agent, distribution of AET in mammary tumor-bearing mice. Shapiro, Schwartz, and Kollmann, 223

Radioactive compounds, evaluation of, for detection of cerebral tumors. Long, McAfee, and Winkelman, 98

Radiobiology, VIII International Cancer Congress report, 3

——, molecular, of human cell lines. Erikson and Szybalski, 122

Radiogenic myeloid leukemia, cell-free transimssion of, in the mouse. Jenkins and Upton, 1748

Radiotherapy, VIII International Cancer Congress report, 3

Radiothyroidectomy, of mice bearing tumor L24a, lymphoid-stimulating effect of. Sproul, Grinberg, and Werner, 1090

Rana pipiens, transmissibility and cytology of renal carcinoma of. Roberts, 1709

***Rana temporaria* L.**, tumor in. Elkan, 1641

Rauscher virus, chemotherapeutic testing of drugs in animals given. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762

Rauscher virus-induced leukemia, chemotherapy of. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646

Regeneration, in planarians, combined with carcinogens, effect on tumor induction. Foster, 300

——, of liver, humoral and local factors in. Alston and Thomson, 901

——, of rat liver, humoral factor in. Fisher, Fisher, and Saffer, 914

Regression, spontaneous, of Shope rabbit papilloma. Krieder, 1593

Regulatory circuits, metabolic, and carcinogenesis. Pitot and Heidelberger, 1694

Renal carcinoma, frog, transmissibility and cytology of. Roberts, 1709

——, hamster, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Report on the VIII International Cancer Congress, Moscow, U.S.S.R., July 22–28, 1962, 3

Resistance, basic problem of chemotherapy. Burchenal, 1186

——, of host against sarcomas induced by cellophane film implantation. Klein, Sjögren, and Klein, 84

——, to biological alkylating agents, in chemotherapy. Wheeler, 1334

Respiration, effect of anaerobiosis on glutamine utilization by Ehrlich ascites tumor cells. Kvamme and Svenneby, 291

——, of Landschuetz ascites tumor cells, effect of various agents on. Ram, Kalner, and Bloch-Frankenthal, 600

——, of normal liver and hepatomas, rat. Aisenberg and Morris, 566

Respiratory tract, smoke and influenza effects on, in mice. Leuchtenberger, Leuchtenberger, Ruch, Tanaka, and Tanaka, 555

Reticuloendothelial system, neoplasia of, in mice bearing tumor L24a. Sproul, Grinberg, and Werner, 1090

Reuber hepatoma H-35, amino acid incorporation in. Wagle, Morris, and Weber, 1003

——, carbohydrate enzymes in, compared with hepatomas. Weber and Morris, 987

——, deamination of deoxynucleotides and deoxynucleosides by. Roth, Sheid, and Morris, 454

——, energy pathways of. Aisenberg and Morris, 566

——, enzymes of amino acid metabolism in. Pitot, Peraino, Bottomley, and Morris, 135

——, enzymes of pyrimidine metabolism in. Ono, Blair, Potter, and Morris, 240

——, glucose and fructose metabolism in. Sweeney, Ashmore, Morris, and Weber, 995

——, glucose utilization in homogenates of. Elwood, Lin, Cristofalo, Weinhouse, and Morris, 906

Review, cell surface in tumor virus infection. Vogt, 1519

——, childhood lymphoma in Africa. O'Conor, 1514

——, complex etiology of cancer. Southam, 1105

——, crown gall as anatomical and cytological problem. Kupila, 497

——, epidemiology of breast cancer. Lilienfeld, 1503

——, influence of host factors on the growth of neoplastic cells. Furth, 21

——, nuclear stability during histogenesis, aging, and carcinogenesis. Walker, 157

——, nucleolus of the cancer cell. Busch, Byvoet, and Smetana, 313

——, ribonuclease activity and cancer. Roth, 657

——, symposium on problems basic to cancer chemotherapy, 1181

Rhabdomyosarcoma BW 10139, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Rhabdomyosarcoma MC-1a, in mouse, lack of effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

Rhesus monkeys, pathogenesis of Yaba virus-induced histiocytomas. Sproul, Metzgar, and Grace, 671

——, toxicological studies of Calvacin in. Sternberg, Philips, Cronin, Sodergren, and Vidal, 1036

Ribonuclease, activity of, and cancer, *review*. Roth, 657

Ribonuclease—*Continued*

——, effect of corticosteroids on, in lymphosarcoma P1798. MacLeod, King, and Hollander, 1045

——, effects of, on DNA synthesis in cultured mammalian cells. Shah, 1137

——, in experimental and human tumors by histochemical substrate film method. Daoust and Amano, 131

Ribonucleic acid. *See also* Nucleic acids.

——, in rat liver, effects of thioacetamide on labeling of. Adams and Busch, 576

——, response of ribosomal fractions from rat liver and Novikoff ascites cells to. O'Neal and Griffin, 628

RNA. *See* Ribonucleic acid.

Round-cell tumor C1300, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Rous sarcoma virus, amino acid incorporation into protein of tumors induced by. Wagle, Ashmore, and Levine, 1808

——, chick embryo cells infected with, growth *in vivo* in rat brain. Scotti, Dorsey, Lefkowitz, Duwelius, and Sigel, 531

S3A ascitic adenocarcinoma, mice, effect of 3′-amino-3′-deoxyadenosine against. Pugh and Gerber, 640

S91 melanoma. *See* Melanoma S-91.

Salicylate, sodium, treatment of anemia in tumor-bearing hamster with. Sherman and Friedell, 180

Salientia, three different types of tumors in. Elkan, 1641

Salivary gland tumor, in hamster, spontaneous, and anemia. Sherman, Rigby, Hackett, and Friedell, 1689

Salmo gairdnerii, hepatic tumors of. Scarpelli, Greider, and Frajola, 848

Salmonella typhimurium, absence of toxohormone in rat tumors free of. Kampschmidt and Schultz, 751

——, in rat tumor, effect on host. Kampschmidt and Upchurch, 756

Sarcina lutea, effect on ascites tumor cells, in mouse and *in vitro.* Havas, Donnelly, and Porreca, 700

Sarcoma, canine transmissible, nutritional requirements for cultivation of cells of. Prier, 695

——, hamster polyoma virus-induced, properties in culture. Todaro, Nilausen, and Green, 825

——, induced by implantation of cellophane films, host resistance against, in mice. Klein, Sjögren, and Klein, 84

——, induced in rat colon by intraluminal hydrocarbons. Stevenson and von Haam, 569

——, induced remotely in rats fed 3-methylcholanthrene. Huggins and Grand, 477

——, induction, lack of effect of urethan on, by 3,4-benzpyrene. Berenblum and Trainin, 983

——, Rous, chick embryo cells infected with, growth *in vivo* in rat brain. Scotti, Dorsey, Lefkowitz, Duwelius, and Sigel, 531

——, subcutaneous, induced by 3,4,9,10-dibenzpyrene, in mice. Homburger, Treger, and Baker, 1539

Sarcoma 37, ascites cells, cytotoxic effects of hemolytic streptococci on. Havas, Donnelly, and Porreca, 700

——, ascitic and solid forms, physicochemical differences between. Cook, Seaman, and Weiss, 1813

——, mouse, effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

——, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

——, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

——, repeated response of, in tolerant mice, to bacterial endotoxin. O'Malley, Achinstein, and Shear, 890

Sarcoma 180, ascites, effect of gastrically administered adenine on mice bearing. Sartorelli and Upchurch, 1077

——, ascites, effect of 6-uracil methyl sulfone on. Creasey and Haff, 462

——, ascites, effect of Vinca alkaloids against. Johnson, Armstrong, Gorman, and Burnett, 1390

——, ascites, in mice, minimal effect of 3′-amino-3′-deoxyadenosine against. Pugh and Gerber, 640

——, ascites cells, resistance to 6-thioguanine, and combination treatment with azaserine. Ellis and LePage, 436

——, chemotherapy with 6-thioguanine, in mouse. Adams and Bowman, 883

——, effect of combinations of inhibitors of nucleic acid biosynthesis and alkylating agents on. Booth and Sartorelli, 1762

——, effect of methylglyoxalbis(guanylhydrazone) against. Mihich, 1375

——, effect on uterotrophic response to estrogen in mice bearing. Hilf, Lerner, Lang, and Borman, 304

——, growth of, in potassium-deficient mice. Humphrey, 1121

——, implanted on feet of mice, effects of heat and radiation on. Crile, 372

——, in mouse, effect of yeast polysaccharides on. Diller, Mankowski, and Fisher, 201

——, leukemia induced by, and reciprocal immunity. Pasqualini, Holmberg, Rabasa, and Pavlovsky, 974

——, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

——, solid, inhibition of purine synthesis by 6-mercaptopurine in. Bennett, Simpson, Golden, and Barker, 1574

Sarcoma SI, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Sarcoma S32, mouse, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

Sarcomycin, inhibition of DNA synthesis by, in Ehrlich ascites cells. Sung and Quastel, 1549

Serine, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003

Serine dehydrase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

——, in rat hepatomas. Bottomley, Pitot, and Morris, 392

Serofloculants, evaluation of steroids which are. Blickenstaff and Foster, 778

Serotonin, effect on heat susceptibility of tumors. Crile, 372

Serratia marcescens, effect on ascites tumor cells, in mouse and *in vitro.* Havas, Donnelly, and Porreca, 700

——, repeated response of Sarcoma 37 to endotoxin of. O'Malley, Achinstein, and Shear, 890

Serum, from partially hepatectomized rats, action on explants of liver and tumors. Wrba and Rabes, 1116

——, human, enzyme in, which hydrolyzes leucyl-β-naphthylamide. O'Connell and Winzler, 78

Serum albumin-I^{131}, use in external detection of brain tumors. Long, McAfee, and Winkelman, 98

Serum aldolase, of host rat, during growth of tumor contaminated with bacteria. Kampschmidt and Upchurch, 756

Serum lactic dehydrogenase, and tumor size during therapy of cancer patients. Brindley and Francis, 112

Shope rabbit papilloma, spontaneous regression of. Kreider, 1593

Sialic acid, content of erythrocyte and of mouse ascites tumor cell. Miller, Sullivan, and Katz, 485

Skin, incorporation of I^{125}-labeled iododeoxyuridine into DNA of, in human. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

——, mouse, adrenal imbalance in carcinogenesis of. Trainin, 415

Smoking, epidemiologic data. Doll, 1613

Smoking machines, amount of tobacco tar retrieved from. Graham, Crouch, Levin, and Bock, 1025

Sodium salicylate. *See* Salicylate.

Sonication, for release of nucleoli from preparations of Walker carcinosarcoma and rat liver. Muramatsu, Smetana, and Busch, 510

Sound stress, effect on methylcholanthrene-induced carcinogenesis in mice. Molomut, Lazere, and Smith, 1097

Spectroscopy, electron spin resonance, of neoplasms, in mouse tissues. Nebert and Mason, 833

——, fluorescence, of carcinogenic hydrocarbons *in vivo* and *in vitro*. Sloane and Loeser, 1555

Spermidine, effect on tumor inhibition by methylglyoxalbis (guanylhydrazone). Mihich, 1375

Spleen, incorporation of I^{125}-labeled iodiodeoxyuridine into DNA of, in mouse. Clifton, Szybalski, Heidelberger, Gollin, Ansfield, and Vermund, 1715

Splenectomy, effect on lysozyme activity in rat kidney. Perri, Cappuccino, Faulk, Mellors, and Stock, 431

Spontaneous carcinoma, hamster, and anemia. Sherman, Rigby, Hackett, and Friedell, 1689

Spontaneous regression, of Shope rabbit papilloma. Kreider, 1593

Squamous-cell cancer, human, histochemical evaluation of enzymes in. Kawakatsu and Mori, 539

Statistics, method of evaluating tumor morbidity or mortality. Pilgrim and Dowd, 45

Steroids. *See also* specific steroids.

——, cortical, enzymes in tissues reponsive to. Rosen, 1447

——, effect on lymphomas, *in vivo* studies on tumor resistance and collateral sensitivity. Lampkin-Hibbard, Mukherjee, and Heidelberger, 468

——, effects of triamcinolone diacetate on levels of 3-methylcholanthrene in rat mammary glands. Bolasny, Warren, and Prohaska, 971

——, evaluation of steroid seroflocculants. Blickenstaff and Foster, 778

——, production by adrenals of tumor-bearing rats. Cohen and Kim, 93

——, summary of discussions on, in chemotherapy. Segaloff, 1465

Stomach, intrinsic factor deficiency in malignant neoplasia of. Nelson and Howe, 1756

Strain. *See also* under specific name of cell strain, e.g., HeLa.

Strain Fernandes amnion cells, effect of human leukemia brain extracts on, in tissue culture. Whitaker, Bovis, Andrews, and Sulkin, 519

Strain FL amnion cells, effect of human leukemia brain extracts on, in tissue culture. Whitaker, Bovis, Andrews, and Sulkin, 519

——, human chromosomes of. Petursson and Fogh, 1021

Strain L cells, effect of serum from partially hepatectomized rats on. Wrba and Rabes, 1116

——, sensitivity to mammalian cells to nitrogen and sulfur mustards, *in vitro*. Walker and Helleiner, 734

Strain WISH amnion cells, effect of human leukemia brain extracts on, in tissue culture. Whitaker, Bovis, Andrews, and Sulkin, 519

Streptococci, hemolytic, cytotoxic effects of, on ascites tumor cells. Havas, Donnelly, and Porreca, 700

Streptoccuss faecalis, effect on ascites tumor cells, in mouse and *in vitro*. Havas, Donnelly, and Porreca, 700

Streptococcus pyogenes, effect on ascites tumor cells, in mouse and *in vitro*. Havas, Donnelly, and Porreca, 700

Succinic dehydrogenase, histochemical determination in human squamous-cell cancer. Kawakatsu and Mori, 539

Sulfur mustard. *See* Bis(β-chloroethyl)sulfide.

Summary, of discussions on alkylating agents. Price, 1350

——, of discussion on basic concepts in neoplasia. Weber, 1491

——, of discussions on newer chemotherapeutic agents. Holland, 1442

——, of discussion on purine antagonists. Hitchings, 1218

Susceptibility, heightened, to heterografts of mouse leukemia, special property of cheek pouch. Adams, 1841

——, of infant mice to tumorigenesis. Klein, 1701

——, toward cheek pouch heterografts of mouse leukemia in hamsters. Adams, 1834

Suspension cultures, of human tumor cells. Moore, Mount, Tara, and Schwartz, 1735

Symposium, on epidemiology of cancer, breast cancer. Lilienfeld, 1503

——, on epidemiology of cancer, childhood lymphoma in Africa. O'Conor, 1514

——, on epidemiology of cancer, geographical pathology of primary liver cancer. Higginson, 1624

——, on mechanisms in differentiation. Vogt, 1519

——, problems basic to cancer chemotherapy, 1181

Tar, tobacco, amount retrieved from smoking machines. Graham, Crouch, Levin, and Bock, 1025

TEM. *See* Triethylene melamine.

Terephthalanilide, action on *Escherichia coli*. Pine, Harzewski, and Wissler, 932

——, effect on murine leukemogenic Rauscher virus. Chirigos Rauscher, Kamel, Fanning, and Goldin, 762

Terramycin, effect on fine structure of HeLa cell mitochondria. Journey and Goldstein, 551

TESPA. *See* N,N′,N″-Triethylenethiophosphoramide.

Testicular tumor H 10119, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833

Tetraphenylporphinesulfonate-Co^{57}, use in external detection of brain tumors. Long, McAfee, and Winkelman, 98

Thioacetamide, effects on incorporation of orotic acid into RNA fractions in rat liver. Adams and Busch, 576

6-Thioguanine, action on tumor cells *in vitro*. Brown, Klein, Kandaswamy, and Mandel, 254

——, biochemical effects of. LePage, 1202

——, biochemical studies of resistance to, in tumor-bearing mice. Ellis and LePage, 436

——, chemotherapy of Sarcoma 180 and Adenocarcinoma 755 with. Adams and Bowman, 883

——, combined with uracil mustard, effect against transplanted mouse tumor. Booth and Sartorelli, 1762

——, in chemotherapy of mouse mammary tumors. LePage and Howard, 622

——, sensitivity of intestinal mucosa and bone marrow to, in rabbit. Marchesi and Sartorelli, 1769

——, use of nucleosides in resistance to. LePage and Junga, 739

Thioguanine nucleotide pyrophosphorylase, activity in bone marrow and intestinal mucosa, in rabbit. Marchesi and Sartorelli, 1769

Thiopurines, antitumor activities of. Elion, Callahan, Rundles, and Hitchings, 1207

ThioTEPA. *See* N,N′,N″-Triethylenethiophosphoramide.

Threonine dehydrase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

——, in rat hepatomas. Bottomley, Pitot, and Morris, 392

——, reciprocal relationship with glucose-6-phosphate dehydrogenase in rat hepatomas. Bottomley, Pitot, Potter, and Morris, 400

Thymidine triphosphate, patterns of synthesis of. Kielley, 801

Thymine, acid-soluble compounds of, *in vitro* synthesis by human neoplastic tissues. Birnie and Heidelberger, 420

Thymine reductase, in minimal-deviation rat hepatomas. Ono, Blair, Potter, and Morris, 240

Thymus, and histogenesis of Gross's viral induced mouse leukemia. Goodman and Block, 1634

——, in mice, unilateral thymic lymphoma. Siegler and Rich, 1669

——, rat, effects of mitomycin C and actinomycin D on nucleic acid synthesis in. Schwartz, Sternberg, and Philips, 1125

Thyrotropic pituitary tumor, mouse, lymphoid hyperplasia and neoplasia associated with. Sproul, Grinberg, and Werner, 1090

Thyroxine, effects on nucleic acid and protein metabolism in mouse pituitary tumors. Moolten and Scott, 688

Time-lapse motion pictures, nucleolar "caps" produced by 4-nitroquinoline *N*-oxide. Reynolds, Montgomery, and Karney, 535

Tissue culture, carbon dioxide fixation in JA-1 sarcoma. McCoy, Orr, and Patterson, 1830

——, cellular alteration in stable amnion cells produced by human leukemia brain extracts. Whitaker, Bovis, Andrews, and Sulkin, 519

——, chromosomes of primary human amnion cells and FL cells. Petursson and Fogh, 1021

——, effects of mitomycin C on HeLa cells. Kuroda and Furuyama, 682

——, fine structure of cultured MAC-21 and HeLa cells. Fuse, Price, and Carpenter, 1658

——, maturation of transplantable leukemic cells in diffusion chambers *in vivo*. Parrish and Kleinfeld, 1164

——, of canine transmissible sarcoma cells. Prier, 695

——, of cells from human female genitourinary tract. Cummins and Ross, 1581

——, of chick embryo cells, growth *in vivo* in rat brain. Scotti, Dorsey, Lefkowitz, Duwelius, and Sigel, 531

——, of chick embryo tissues, biologic crystals and particles in. Rose, 279

——, of Ehrlich ascites cells, and dehydrogenase activity. DiPaolo, 184

——, of human cancer cell line H.Ep. #2, chromosomes in. Norryd and Fjelde, 197

——, of human cells, effect of factor from HeLa cells. Foley, Kennedy, and Ross, 368

——, of human tumor cells in suspension cultures. Moore, Mount, Tara, and Schwartz, 1735

——, of mammalian cells, autoradiographic studies of effects of antibiotics, amino acid analogs, and nucleases on DNA synthesis in. Shah, 1137

——, of mouse fibroblasts, properties of DNA. Brewer and Aronow, 285

——, of polyoma virus-induced hamster tumor cells. Todaro, Nilausen, and Green, 825

——, of treated tumors. Grossfeld, Crossley, and Allison, 770

——, sensitivity of mammalian cells to nitrogen and sulfur mustards. Walker and Helleiner, 734

——, serum action on tissue explants following partial hepatectomy of rats. Wrba and Rabes, 1116

——, terramycin effect on fine structure of HeLa cell mitochondria. Journey and Goldstein, 551

Toad, tumors in claw-footed. Elkan, 1641

Tobacco tar, amount retrieved from smoking machines. Graham, Crouch, Levin, and Bock, 1025

Toxicity, of Calvacin, in various mammals. Sternberg, Philips, Cronin, Sodergren, and Vidal, 1036

Toxohormone, absence in rat tumors free of bacterial contamination. Kampschmidt and Schultz, 751

Transplantable tumors, development of, in mice bearing Friend virus. Dawson, Fieldsteel, and Bostick, 349

——, in mice bearing Friend virus. Fieldsteel, Dawson, and Bostick, 355

Transplantation, heterologous, of mouse leukemia in hamster cheek pouch. Adams, 1834

——, heterologous, of mouse leukemia in hamster, special property of cheek pouch. Adams, 1841

——, of ascites tumor *in vitro*, progression of. Rabotti, Geldner, and Hoffner, 165

——, of myeloid leukemia in mice, plasma lactic dehydrogenase in. Nishio, Jacobson, Jenkins, and Upton, 340

——, of sarcomas in pretreated mice. Klein, Sjögren, and Klein, 84

2′,3′,5′-Triacetyl-6-azauridine, clinical and pharmacological studies with. Creasey, Fink, Handschumacher, and Calabresi, 444

Triamcinolone diacetate, effects on levels of 3-methylcholanthrene in rat mammary glands. Bolasny, Warren, and Prohaska, 971

Triethylene melamine, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, effect on murine leukemogenic Rauscher virus. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762

——, in chemotherapy of Moloney virus leukemia. Glynn, Moloney, Chirigos, Humphreys, and Goldin, 269

N,N′,N″-Triethylenethiophosphoramide, combined with thioguanine, lack of effect on thioguanine inhibition of Sarcoma 180. Booth and Sartorelli, 1762

——, effect on IRC 741 leukemia, with folic acid. McKenzie and Brody, 118

——, inhibition of dehydrogenases and growth in Ehrlich ascites tumor by. DiPaolo, 184

Triolein, I^{131}-labeled, absorption of, in tumor-bearing rats. Baker, 928

Triturus pyrrhogaster, spontaneous and transmissible tumor in. Inoue and Singer, 1679

Trout, rainbow, hepatic tumors of. Scarpelli, Greider, and Frajola, 848

Tryptophan pyrrolase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

Tumor L24a, mouse thyrotropic pituitary tumor strain, and lymphoid hyperplasia. Sproul, Grinberg, and Werner, 1090

Tumorigenesis. *See* Carcinogenesis.

Tumors, growth, effect of adrenalectomy and pyridoxine deficiency on, in mice. Benton, 1016

——, growth, effect of tissue homogenates on. Fisher and Fisher, 1651

——, growth, in pinealectomized rats. Rodin, 1545

——, induced in hamster with diethylnitrosamine. Herrold and Dunham, 773

——, morbidity, method of evaluating. Pilgrim and Dowd, 45

——, mortality, method of evaluating. Pilgrim and Dowd, 45

——, mouse, electron spin resonance spectroscopy of. Nebert and Mason, 833
——, pituitary, of hamsters, biological characteristics of. Russfield, Friedler, and Frenkel, 720
——, rat, free of bacterial contamination, absence of toxohormone in. Kampschmidt and Schultz, 751
——, resistance, to 5-fluorouracil, in Gardner lymphosarcoma. Kasbekar and Greenberg, 818
——, spontaneous and transmissibile, in the newt. Inoue and Singer, 1679
——, three different types in Salientia. Elkan, 1641
——, viruses of, cell surface in infection with, *review*. Vogt, 1519
Tyrosine α-ketoglutarate transaminase, activity in rat liver and hepatomas. Pitot, Peraino, Bottomley, and Morris, 135

Ultrastructure. *See* Electron microscopy.
6-Uracil methyl sulfone, biochemistry and pharmacology of, in mice, rats, and dogs. Creasey and Haff, 462
Uracil mustard, combined with 6-thioguanine, effect against transplanted mouse tumors. Booth and Sartorelli, 1762
Uracil reductase, in minimal-deviation rat hepatomas. Ono, Blair, Potter, and Morris, 240
Urethan, *See* Ethyl carbamate.
Uterus, response to estrogen in tumor-bearing mouse. Hilf, Lerner, Lang, and Borman, 304

Vaccinia virus, interaction with Adenocarcinoma 755. Durr and Briody, 410
——, interaction with Ehrlich ascites carcinoma. Durr and Briody, 1571
Valine, incorporation in normal and regenerating liver and liver tumors. Wagle, Morris, and Weber, 1003
Velban. *See* Vinblastine.
Vinblastine, analog of, clinical treatment of lymphomas and leukemias with Vincristine. Bohannon, Miller, and Diamond, 613
——, in chemotherapy. Johnson, Armstrong, Gorman, and Burnett, 1390
——, in neoplastic disease, clinical tests. Midwest Cooperative Chemotherapy Group, 169
Vinca alkaloids, as oncolytic agents. Johnson, Armstrong, Gorman, and Burnett, 1390
Vincaleukoblastine. *See* Vinblastine.
Vincristine, effect on survival of leukemic mice. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646
——, in chemotherapy. Johnson, Armstrong, Gorman, and Burnett, 1390
——, in clinical treatment of lymphomas and leukemias. Bohannon, Miller, and Diamond, 613
Vinrosidine, in chemotherapy. Johnson, Armstrong, Gorman, and Burnett, 1390
Viruses, and cell-free transmission of radiogenic myeloid leukemia in the mouse. Jenkins and Upton, 1748
——, animal, effect of actinomycins on growth of. Reich, 1428
——, anti-viral effect of 5-iodo-2′-deoxyuridine. Calabresi, 1260
——, anti-viral effect of 5-iododeoxyuridine. Prusoff, 1246
——, fowl pox, hyperplasia induced in chorioallantoic membrane of chicken embryos. Wagle, Ashmore, and Levine, 1808
——, Friend, cytotoxic antibody against leukemias induced by. Old, Boyse, and Lilly, 1063
——, Friend, leukemia, pathologic studies in mice. Dawson, Fieldsteel, and Bostick, 349
——, Gross, electron microscopy of leukemia induced in rats with. Okano, Kunii, and Furth, 1169
——, infection, cell surface in, of tumor, *review*. Vogt, 1519
——, influenza, effect alone and with cigarette smoke on mouse respiratory tract. Leuchtenberger, Leuchtenberger, Ruch, Tanaka, and Tanaka, 555
——, in oncology, VIII International Cancer Congress report, 3
——, L-S strain, isolated from chloroleukemic Wistar rat. Lum and Schreiner, 1742
——, Moloney, leukemia, chemotherapy of. Glynn, Moloney, Chirigos, Humphreys, and Goldin, 269
——, mouse mammary tumor, neutralization by rabbit antisera against C3Hf tissue. Blair, 381
——, particles, in Golgi region of NK mouse lymphoma. Lapis and Mercer, 676
——, particles, production by mouse mammary epithelium in organ culture. Lasfargues and Feldman, 191
——, passage A, and histogenesis of Gross's mouse leukemia. Goodman and Block, 1634
——, passage A, in mouse mammary glands, electron microscopy of. Feldman, Gross, and Dreyfuss, 1604
——, pneumonia, endemic, isolated from induced lymphoma in mice. Bather and Cushing, 707
——, polyoma, hamster cells transformed by, antigenic properties. Bases, 811
——, polyoma, hamster tumor cells induced by, growth properties of. Todaro, Nilausen, and Green, 825
——, Rauscher, chemotherapeutic testing of drugs in animals given. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 762
——, Rauscher, murine leukemogenic, chemotherapy of. Chirigos, Rauscher, Kamel, Fanning, and Goldin, 1646
——, Rous sarcoma, amino acid incorporation into protein of tumors induced by. Wagle, Ashmore, and Levine, 1808
——, Rous sarcoma, chick embryo cells infected with, growth *in vivo* in rat brain. Scotti, Dorsey, Lefkowitz, Duwelius, and Sigel, 531
——, Shope rabbit papilloma, and spontaneous regression. Kreider, 1593
——, studies on generalized Friend disease in mice. Fieldsteel, Dawson, and Bostick, 355
——, vaccinia, interaction with Adenocarcinoma 755. Durr and Briody, 410
——, vaccinia, interaction with Ehrlich ascites carcinoma. Durr and Briody, 1571
——, Yaba, histiocytomas induced in primates by. Sproul, Metzgar, and Grace, 671
Vitamin B-12, effect on IRC 741 leukemia, with folic acid. McKenzie and Brody, 188
VLB. *See* Vinblastine.

Walker carcinosarcoma 256, acidic nuclear proteins of. Steele and Busch, 1153
——, ascites, and tumor nodules in chick chorioallantoic membrane. Leighton, 148
——, contaminated with or free of bacterial contamination, effect on host. Kampschmidt and Upchurch, 756
——, electron microscopy of. Smetana and Busch, 1600
——, growth in pinealectomized rats. Rodin, 1545
——, hepatic metastases of, effect of prolactin. Fisher and Fisher, 1532
——, intermediary metabolites of L-lysine-U-C^{14} in. Davis and Morris, 143
——, intraportal injection of cells of, into parabionts, hepatic metastases. Fisher and Fisher, 896
——, isolation of nucleoli of. Desjardins, Smetana, Steele, and Busch, 1819
——, isolation of nucleoli of. Muramatsu, Smetana, and Busch, 510

Walker carcinosarcoma 256—*Continued*

——, lack of effect on intestinal absorption of fat, in rats bearing. Baker, 928

——, peptidase activities, in rat. Wu and Bauer, 954

——, plasma glycoproteins in rat bearing. Macbeth, Bekesi, and Tuba, 938

——, rat, free of bacterial contamination, absence of toxohormone in. Kampschmidt and Schultz, 751

——, rat, ribonuclease and deoxyribonuclease activities in. Daoust and Amano, 131

——, solid transplants in tissue culture, effect of serum from partially hepatectomized rats on. Wrba and Rabes, 1116

——, treated, tissue culture of. Grossfeld, Crossley, and Allison, 770

Wander compounds *See* Phthalanilide derivatives.

***Xenopus laevis* D.**, tumors in. Elkan, 1641

X-radiation, alone and with deuterium treatment, effect on murine leukemia. Biggs, Eiselein, and Wilcox, 1059

——, chest and legs, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, in treatment of Moloney virus leukemia. Glynn, Moloney, Chirigos, Humphreys, and Goldin, 269

——, myeloid mouse leukemia induced with, plasma lactic dehydrogenase activity. Nishio, Jacobson, Jenkins, and Upton, 340

——, total-body, effect of pretreatment with, on tumor growth and white blood cells. Schmid, Schmid, and Sugiura, 607

——, total-body, in inhibiting urethan lung tumors. Foley and Cole, 1176

X-ray sensitization, of DNA by 5-iododeoxyuridine. Erikson and Syzbalski, 122

Yaba virus, histiocytomas induced in primates by. Sproul, Metzgar, and Grace, 671

Yeast polysaccharides, effect on mouse tumors. Diller, Mankowski, and Fisher, 201

Yoshida ascites hepatoma, glycolysis *in vivo*, in rat. Del Monte and Rossi, 363

——, rat, submicroscopic chracteristics of four strains. Hoshino, 209

Yoshida ascites hepatoma 7974, ascites, and tumor nodules in chick chorioallantoic membrane. Leighton, 148

Yoshida sarcoma, solid transplants in tissue culture, effect of serum from partially hepatectomized rats on. Wrba and Rabes, 1116

Zymosan, effect on mouse tumors. Diller, Mankowski, and Fisher, 201
